CODEX: ADEPTUS CUSTODES

Official Update Version 1.0

Although we strive to ensure that our rules are perfect, sometimes mistakes do creep in, or the intent of a rule isn't as clear as it might be. These documents collect amendments to the rules and present our responses to players' frequently asked questions. As they're updated regularly, each has a version number; when changes are made, the version number will be updated, and any changes from the previous version will be highlighted in **magenta**. Where a version number has a letter, e.g. 1.1a, this means it has had a local update, only in that language, to clarify a translation issue or other minor correction.

Q: Do the modifiers for the Wrath Angelis stack (i.e. would you subtract 3 for an ADEPTUS CUSTODES CHARACTER)?

A: No.

A: Yes, provided Captain-General Trajann Valoris is on the battlefield when you use the Stratagem.

Q: How does the Ever Vigilant Stratagem interact with CHARACTERS with a Wounds characteristic of less than 10? Can Ever Vigilant allow a unit to target such a CHARACTER who arrives as reinforcements even if they are not the closest enemy unit?

A: No, unless they shoot weapons that can target CHARACTERS even if they are not the closest enemy unit.

A: Yes.

Q: Does the Wrath Angelis affect its bearer?

FAQs

*Q: How many dice does the Brutal Strength Regimental Doctrine allow me to re-roll when a **VEHICLE** in my army fires a ranged weapon that makes a random number of attacks? Is it one dice per vehicle, or one dice per weapon?*

A: You can re-roll one dice per weapon.

Q: When do I pay the Command Point cost for the Vortex Missile Stratagem?

A: After you've had a result of 8 or more for the Hour is Nigh ability, allowing you to fire the Deathstrike missile, but before resolving the shot.

*Q: If I have, for example, a **TALLARN** unit of Leman Russ Battle Tanks with three tanks, can I use the Ambush Stratagem once to place all three models in ambush?*

A: Yes. The same is true for any other Tallarn vehicle squadron (Basilisks, Hellhounds, etc.).

Q: If I issue an order to a unit with an Officer who has the Laurels of Command, and I roll a 4+ to issue another order to the same unit, do I resolve the first order before issuing the second?

A: Yes.

Q: Can I use The Laurels of Command to issue the same order twice to the same unit?

A: No, the second order issued must be a different order.

Q: How do The Laurels of Command and Superior Tactical Training interact? For example, my Warlord is a Cadian Company Commander and I give him The Laurels of Command and the Superior Tactical Training Warlord Trait. How many orders is he potentially allowed to issue each turn, and how many units can those orders affect?

A: If he issues an order to a **CADIAN INFANTRY** unit within 6" (unit A) using his Voice of Command ability, first roll a dice for Superior Tactical Training; on a 4+, you can pick another **CADIAN INFANTRY** unit (unit B) within 6" for that order to affect. Then roll a dice for The Laurels of Command; on a 4+ he can issue a second order to the first unit (unit A). You can then roll again for Superior Tactical Training; on a 4+, you can pick another Cadian Infantry unit within 6" for the second order to affect (this does not have to be unit B, but can be).

Note that when you use Superior Tactical Training, an order is not issued – rather, an already issued order affects an additional unit. So you cannot use The Laurels of Command to generate further orders as a result of using Superior Tactical Training, but you can use Superior Tactical Training to make secondary orders caused by The Laurels of Command affect an additional unit.

BROOD BROTHERS

*Q: Can an **ASTRA MILITARUM** Detachment that is included in an army alongside a **GENESTEALER CULTS** Detachment using the Brood Brothers rule gain a Regimental Doctrine, and can the units in such a Detachment use any of the regiment-specific Stratagems, Warlord Traits, Orders, Relics, etc.?*

A: No, Brood Brothers Detachments cannot use any regiment-specific rules.

Note that when included in an army alongside a **GENESTEALER CULTS** Detachment, all **ASTRA MILITARUM** units should replace their <REGIMENT> keyword with **BROOD BROTHERS** in every instance on their datasheets. Full rules for using Brood Brothers detachments will be described in *Codex: Genestealer Cults*.

*Q: Can an **ASTRA MILITARUM** Detachment that is included in an army alongside a **GENESTEALER CULTS** Detachment using the Brood Brothers rule include any Astra Militarum named characters?*

A: No.

FAQs

*Q: When a Stratagem from Codex: Chaos Daemons uses the **DAEMON** keyword, can it be used to affect any unit with the **DAEMON** keyword, or only units with the **DAEMON** Faction keyword?*

A: These Stratagems can only affect units with the **DAEMON** Faction keyword.

Q: Does the Blue Scribes' Xirat'p's Sorcerous Barrage ability allow them to manifest a psychic power that has already been manifested?

A: Yes.

Q: If I include Be'lakor in a Detachment in which every other unit owes its allegiance to the same Chaos God, does that Detachment benefit from the Daemonic Loci ability?

A: No, as Be'lakor does not owe allegiance to any one Chaos God.

Q: What Warlord Traits can Be'lakor have?

A: Be'lakor can have any of the Warlord Traits from Warhammer 40,000 core rules.

Q: If I upgrade a Burning Chariot to have Chanting Horrors, do I pay 5 points for each Chanting Horror, or 5 points for all three?

A: 5 points for all three.

*Q: Can a **CHARACTER** that has been set up on the battlefield using the Denizens of the Warp Stratagem use the Daemonic Ritual ability to summon a **DAEMON** unit during the same phase?*

A: No – units that arrive as reinforcements count as having moved for all rules purposes and the Daemonic Ritual ability is used instead of moving.

*Q: If a **GREY KNIGHTS** unit deals the final wound on a **DAEMON** equipped with the Impossible Robe, the player uses the Robe to re-roll the failed save, and the result is a 1 (meaning the Daemon is immediately slain), does the **DAEMON** count as being slain by a **GREY KNIGHTS** unit for purposes of using the Daemonic Incursion Stratagem?*

A: Yes.

Q: If a unit of Plaguebearers has had the Plague Banner Stratagem used on them, and is currently under the effects of the Virulent Blessing psychic power, what damage do their Plagueswords inflict on wound rolls of 7+?

A: 4.

Q: For the purposes of the Psychic Focus matched play rule, is the Miasma of Pestilence psychic power from Codex: Chaos Daemons the same psychic power as in Codex: Death Guard?

A: Yes. More generally, if psychic powers have the same name, they are the same psychic power for the purposes of Psychic Focus.

FAQs

*Q: If I have a **DAEMON** model that can only be included once in my army – for example, the Changeling – and that model is slain during the game, can I use Daemonic Ritual to attempt to summon it and add it to my army again?*

A: Yes. Note that if you’re playing a matched play game you’ll need the appropriate reinforcement points to do so.

*Q: Does disembarking effectively prevent a **CHAOS CHARACTER** from summoning a **DAEMON** unit that turn using the Daemonic Ritual ability?*

A: Yes. Models that disembark count as having moved for all rules purposes, including Daemonic Ritual.

Q: If I am playing a mission such as The Relic, which has an objective marker that a unit can carry, and Cypher is carrying that objective marker when he is slain, what happens?

A: The objective marker is dropped.

Q: Can a Noise Marine use his Music of the Apocalypse ability if he flees the battlefield?

A: No. This ability can only be used when the model is slain.

Q: Can a Noise Marine that is slain use his Music of the Apocalypse ability to shoot any viable target, or does it have to target the unit that killed him?

A: It can shoot at any viable target.

Q: If a Noise Marine is slain whilst its unit is within 1" of an enemy unit, can he use his Music of the Apocalypse ability to shoot the unit that is within 1"?

A: Yes, but only with a Pistol.

Q: If several Noise Marines are slain in the same attack, can they each use their Music of the Apocalypse ability to throw a grenade, or can only one of them do so?

A: Each of them can throw a grenade.

*Q: If a Noise Marine is slain in the Fight phase, and he uses his Music of the Apocalypse ability to shoot an **IMPERIUM** unit and subsequently rolls a hit roll of 6+, does the Death to the False Emperor ability then grant him an extra attack with that weapon, even though it’s a ranged weapon?*

A: Yes. In this situation, make an extra hit roll against the target on a hit roll of 6+.

Q: Maulerfiends have a wargear option to ‘replace both magma cutters with lasher tendrils’. Does this mean I replace both magma cutters for a single ‘lasher tendrils’ weapon, or do I get two ‘lasher tendrils’ weapons?

A: You replace both magma cutters with a single ‘lasher tendrils’ weapon.

*Q: If I take a unit of **DAEMONS** in a Chaos Space Marines Detachment, do I lose my Legion Trait?*

A: Yes. However, if you summon a unit of **DAEMONS** and add them to your army, doing so does not affect your Legion Trait.

Q: If I give a unit in my army an Icon of Vengeance, then at the start of my first turn use the Beseech the Chaos Gods Stratagem to make that unit dedicated to Khorne, Tzeentch, Nurgle or Slaanesh, does the unit swap its Icon of Vengeance for the Chaos Icon of their god, or does it keep the Icon of Vengeance?

A: It keeps the Icon of Vengeance.

Q: If I roll a 12 on the Chaos Boon table, when adding a Daemon Prince to my army, which Daemon Prince datasheet should I use – the Daemon Prince or the Daemon Prince of Chaos? In addition, what wargear options can it take?

A: Use the Daemon Prince datasheet from *Codex: Chaos Space Marines*. The model can be equipped with any of its normal wargear options, providing you have the right model and it is built appropriately.

*Q: Are the bonus attacks from Death to the False Emperor and the Excess of Violence Stratagem cumulative? For example, if a model with an Attacks characteristic of 1 rolled a hit roll of 6+ when attacking an **IMPERIUM** unit (thereby giving it an extra attack) and then both of those attacks killed enemy models, would I then make two extra attacks for that model? If yes, what happens if I roll hit rolls of 6+ for these attacks?*

A: Yes, they are cumulative. In the example given, you would make two extra attacks but any further hit rolls of 6+ (and any subsequent models slain) would not generate any further attacks.

*Q: If an enemy **CHARACTER** is slain by the Gift of Chaos psychic power, do I need to have the appropriate reinforcement points set aside in order to set up the Chaos Spawn?*

A: Yes, if you are playing a matched play game.

Q: If I manifest the Gift of Chaos psychic power, and target a unit whose models have different Toughness characteristics, which one should I use?

A: Use the highest Toughness characteristic in the target unit.

Daemonic Ritual (pg 117)

Daemonic Icon: If you roll a 1 when taking a Morale test for a unit with any Daemonic Icons, reality blinks and the daemonic horde is bolstered. No models flee and D6 slain Pink Horrors are instead added to the unit.

Split: Each time a Pink Horror is slain, you can add up to two Blue Horrors to its unit before you remove the slain model. Each time a Blue Horror is slain, you can add one pair of Brimstone Horrors to its unit before you remove the slain model. The replacement models cannot be placed within 1" of an enemy model. Note that Horrors that flee do not generate any extra models for their unit.

Matched Play: In matched play you must pay reinforcement points for each and every Blue and Brimstone Horror model that you add to a unit of Horrors, but the additional models can take the unit above its starting strength.

Instrument of Chaos: A unit that includes any Instruments of Chaos adds 1 to their Advance and charge rolls.

Iridescent Horror: When you set up this unit for the first time, you may select a single Pink Horror in the unit – that model has an Attacks characteristic of 2, instead of 1.

Magic Made Manifest: A unit of Horrors can attempt to manifest one psychic power in each friendly Psychic phase, and attempt to deny one psychic power in each enemy Psychic phase. However, when you do so, only roll a single D6 for the Psychic test or Deny the Witch test, and use the result to determine the outcome. Note that this means the Horrors cannot roll a double 1 or 6 to suffer Perils of the Warp. In addition, if the unit manifests the *Smite* psychic power whilst it contains less than 10 Pink Horror models, it only inflicts 1 mortal wound rather than D3.

Ephemeral Daemons: Pink Horrors have an invulnerable save of 4+. Blue Horrors have an invulnerable save of 5+. Pairs of Brimstone Horrors have an invulnerable save of 6+.

Magical Horde: Change the Type of this unit's coruscating flames to Assault 3 whilst the unit contains 20 or more Pink Horrors.

PSYKER

This unit can attempt to manifest one psychic power in each friendly Psychic phase, and attempt to deny one psychic power in each enemy Psychic phase. It knows the *Smite* power. When manifesting or denying a psychic power, first select a model in the unit – measure range, visibility etc. from this model. If a Brimstone Horror is selected, it is slain after the psychic power has been attempted and, if successful, resolved.

FAQs

Q: Can I use the Martyrdom Stratagem when any model from the Celestine unit is slain?

A: No. Only when the entire unit has been destroyed.

Q: The Uplinked Markerlight Stratagem can be used after an enemy unit has been hit by a markerlight. Does this include high intensity markerlights?

A: No.

Q: I choose my Overlord on a Catacomb Command Barge to be my Warlord, and give him the Enduring Will trait. He then gets shot by a lascannon that hits, wounds, isn't saved and causes 4 points of damage. How do I apply Quantum Shielding and Enduring Will?

A: Resolve the Quantum Shielding ability first. If any damage is suffered, the Enduring Will trait then applies.

Q: Does the Targeting Characters matched play mission rule (which says I can only shoot an enemy CHARACTER with a Wounds characteristic less than 10 if it is both visible to the firer and it is the closest enemy unit to the firer) overrule the ability of weapons such as mortars that say 'This weapon can target units that are not visible to the bearer/firer'?

A: No. Such weapons still ignore the requisite for the target to be visible, so can target **CHARACTERS** with a Wounds characteristic of less than 10, provided it is the closest enemy unit to the firer (excluding other Characters with a wounds characteristic less than 10).

FAQs

Q: If the Warlord of my Battle-forged army is an Autarch, can I use the Path of Command ability to refund Command Points when I spend them on Stratagems used during deployment (for example, Cloudstrike, Webway Strike, etc.)?

A: Yes, but only if your Autarch Warlord is on the battlefield when the Stratagem is used.

Q: If the Warlord of my Battle-forged army is an Autarch, does the Path of Command ability refund Command Points when my opponent spends Command Points on their Stratagems?

A: No. This ability only applies to Command Points you spend.

Q: Is the Avatar of Khaine a named character?

A: No.

Q: Can the Avatar of Khaine have a Warlord Trait?

A: Yes.

Q: If I want to arm my Wraithblades with a ghostsword in each hand, how many points do I have to pay for those ghostswords and how many attacks does each Wraithblade get to make with its ghostswords?

A: Ghostswords (plural) is a single weapon profile. You pay for it once per model and you get one bonus attack per model.

Q: The Dark Reapers' Inescapable Accuracy ability no longer mentions Overwatch. Does this mean that they can hit on Overwatch on rolls of 3+?

A: No. Inescapable Accuracy only affects attacks made in the Shooting phase.

Q: If a unit of Dark Reapers (which have the Inescapable Accuracy ability) shoots at a Culexus Assassin (which has the Etherium ability), what roll do the Dark Reapers require to successfully hit the Assassin?

A: 3+.

This is because while the Dark Reapers treat their Ballistic Skill as 6+ because of the Etherium ability, they always score a hit on rolls of 3+ because of their Inescapable Accuracy ability, which is irrespective of their Ballistic Skill characteristic or any modifiers.

*Q: If my army is led by a Harlequins Warlord, for example, and I have a Detachment of Craftworld units, can I use the Treasures of the Craftworld Stratagem to give a **CHARACTER** in the Craftworld Detachment a Remnant of Glory?*

A: Yes. The only requirement to have access to Stratagems is that you have a Detachment of the appropriate Faction. If you have a Craftworld Detachment, you have access to their Stratagems.

*Q: When using the Linked Fire Stratagem, if the first Fire Prism targets a **CHARACTER** that the other Fire Prisms would not normally be able to target (because it is not the nearest model to them), can they still shoot that character?*

A: Yes.

Q: If I use the Supreme Disdain Stratagem on a unit of Striking Scorpions, and that unit is also within range of Karandras' Death by a Thousand Stings ability, what happens each time I roll a hit roll of 6+ for a model in that unit when making a close combat attack?

A: You would then make 2 additional close combat attacks using the same weapon against the same target (or 3 additional attacks if the model the hit roll was made for was a Striking Scorpion Exarch). None of these extra attacks can generate further attacks.

Q: Which, if any, Movement phase rules apply to a move made with the Fire and Fade Stratagem?

A: All such rules apply.

Q: Can a Swooping Hawk unit use Fire and Fade to move over an enemy unit and use the Swooping Hawk Grenade Pack ability? If I use Fire and Fade on a Crimson Hunter, will it crash due to not being able to move its minimum distance? If a unit that can Fly uses Fire and Fade in a Fire and Fury Battlezone, does it have to roll for the Burning Skies special rule?

A: Yes in all cases.

*Q: When a **PSYKER** in my army casts the Quicken psychic power on one of my units, can that unit Advance when it makes this move?*

A: Yes.

Q: When using the Phantasm Stratagem, can the Webway Strike Stratagem be used in conjunction, to move one of the affected units into reserves?

A: No.

*Q: If a **CHARACTER** with the Phoenix Gem is targeted by an enemy unit's attacks, and these attacks cause several successful wounds, the saving throws are taken one at a time. If the Character fails a saving throw and is slain, but the Phoenix Gem causes them to remain in play, what happens to any remaining successful wounds that were allocated – are they lost, or does the Character then have to take saving throws against them?*

A: The **CHARACTER** must then take the remaining saving throws.

FAQs

Q: For the purposes of the Psychic Focus matched play rule, is the Miasma of Pestilence psychic power from Codex: Chaos Space Marines the same psychic power as in Codex: Death Guard?

A: Yes. More generally, if psychic powers have the same name, they are the same psychic power for the purposes of Psychic Focus.

*Q: If my army is led by a Chaos Space Marines Warlord, and I have a Detachment of Death Guard, can I use the Gifts of Decay Death Guard Stratagem to include a Relic on a Death Guard **CHARACTER**?*

A: Yes. The only requirement to have access to Stratagems is that you have a Detachment of the appropriate Faction. If you have a Death Guard Detachment, you have access to their Stratagems.

Q: Can Poxwalkers use the Curse of the Walking Pox ability to increase the unit above its starting strength?

A: Yes.

Q: If the Poxwalkers' Curse of the Walking Pox ability increases the unit above its starting strength in a matched play game, does this cost reinforcement points?

A: Yes, you must pay reinforcement points for each Poxwalker model that you add to the unit that would increase the unit above its starting strength.

Q: When adding models to a unit of Poxwalkers as a result of the Curse of the Walking Pox ability, can those new models fight in the same Fight phase?

A: Yes, but only if their unit has not yet been chosen to Fight this phase.

Q: If I cast Blades of Putrefaction on a model equipped with the Plaguebringer relic, how many mortal wounds can that model inflict with Plaguebringer and what do I need to roll to inflict them?

A: In this situation, in addition to the normal damage, on a wound roll of 5, Plaguebringer would inflict 1 mortal wound, and on a wound roll of 6, Plaguebringer would inflict 2 mortal wounds.

Q: Are the Biologus Putrifier's hyper blight grenades affected by his Blight Racks ability?

A: No.

*Q: If Mortarion attacks an **IMPERIUM** unit with Silence (using the eviscerating blow profile), and the hit roll is a 6 (allowing him to make an extra attack with Silence due to the Death to the False Emperor ability), does the extra attack have to be made using the same profile, or can it be made with the weapon's other profile (reaping scythe) instead?*

A: The extra attack can be made using either profile.

Q: If Mortarion gets to make an extra attack with Silence due to the Death to the False Emperor ability and I choose to make it with the reaping scythe profile, do I roll 1 hit roll or 3?

A: 3.

*Q: If the Cloud of Flies Stratagem is used on a **DEATH GUARD CHARACTER**, does its effect – preventing enemy models shooting it unless it's the closest visible target – take precedence over the ability that, for example, sniper rifles have, that enables them to target a **CHARACTER** even if they are not the closest enemy unit?*

A: Such weapons cannot target the character that is under the effects of Cloud of Flies (unless the character is the closest visible target).

Q: If a unit such a Mortarion is benefitting from both the Blades of Putrefaction psychic power (from Codex: Death Guard) and the Virulent Blessing psychic power (from Codex: Chaos Daemons) and a wound roll of 7+ is rolled, how many mortal wounds are inflicted in addition to the normal damage (i.e. is it 1, or is that also doubled)?

A: Only 1 mortal wound is inflicted in addition to the normal (doubled) damage.

FAQs

Q: How do Dragonfire bolts behave when shooting units that aren't in cover, but have a rule that means they have 'the benefit of cover' (e.g. Jormungandr units with the Tunnel Networks ability)? Would you still add 1 to the hit rolls for Dragonfire bolts?

A: No. You add 1 to the hit rolls against units that are in cover (i.e. entirely on or within a terrain feature). Units receiving the benefit of cover while not being in cover do not count.

Q: How does the xenophase blade interact with invulnerable saves that don't allow saves to be re-rolled (e.g. from an Archon's Shadowfield ability, or the Chaos Daemons' Warp Surge Stratagem)?

A: In such cases, the successful invulnerable saves must be re-rolled. The intent of the wording of Shadowfield and Warp Surge is to prevent a re-roll of an unsuccessful save, not to prevent an obligatory re-roll of a successful one.

Q: If I use the Castellan of the Black Vault Warlord Trait on a weapon with multiple profiles, like a combi-weapon or guardian spear, does the additional damage apply to all of that weapon's profiles?

A: Yes.

Q: Can a Watch Captain replace his chainsword and master-crafted boltgun with a storm bolter and another chainsword, and then replace his 'new' chainsword with a relic blade?

FAQs

*Q: The Voidraven Bomber's Void Mine rule allows you to pick a unit the Voidraven flew over and roll three D6 for each **VEHICLE** or **MONSTER** in the unit, or one D6 for 'every other model in the unit'. Does this mean 'every other type of model (other than **VEHICLES** or **MONSTERS**)', or 'every second model'?*

A: It means the former – roll one D6 for every model in the unit that is not a **VEHICLE** or a **MONSTER**. So, for example, if the unit contains 10 **INFANTRY** models, you would roll ten D6.

Q: Can the Vexator Mask relic force a charging unit to attack after all other units have done so?

A: Yes, unless that chosen unit has an ability that allows it to fight first in the Fight phase, in which case it instead fights as if it didn't have that ability.

Q: If a Succubus is given the Serpentin combat drug, does its Weapon Skill characteristic increase to 1+? If so, does the Succubus still hit if a hit roll of 2 is rolled for an attack for a melee weapon and, due to an ability, I have to subtract 1 from that hit roll?

A: Yes, and yes – only unmodified hit rolls of 1 automatically fail.

*Q: If the only **KABAL OF THE BLACK HEART** unit in my battle-forged army is in an Auxiliary Support Detachment, but my army includes another **DRUKHARI** Detachment that is not an Auxiliary Support Detachment, can I still use the Agents of Vect Stratagem?*

A: Yes, so long as the **KABAL OF THE BLACK HEART** unit is on the battlefield.

Q: If a model is slain by an ossefactor, and the mortal wound inflicted by the ossefactor's ability causes another model in that unit to be slain, do I roll again to see if another mortal wound is inflicted?

A: No.

*Q: If I am playing a matched play organised event that has an upper limit of 3 Detachments per Battle-forged army, what is the maximum number of **DRUKHARI** Patrol Detachments I can include?*

A: 3.

Whilst the Raiding Force ability in *Codex: Drukhari* mentions Battle-forged armies of 6 or more Detachments, this is designed for narrative play games, or for matched play games with larger (or no) limits on the number of Detachments you can include in your Battle-forged armies. FAQs

Q: How does the Riddle-smiths Masque Form interact with abilities that generate additional attacks or score additional hits?

A: If a unit has an ability that generates extra attacks on a roll that exactly matches the result of a Riddle-smiths roll, the extra attack is generated. Note that the original attack still misses, and if the hit roll for the extra attack also matches the result of the Riddle-smiths roll, it also misses. Likewise, if a weapon has an ability that scores additional hits on a roll that exactly matches the result of a Riddle-smiths roll, it would score those additional hits, but they'd all miss.

Q: If a unit Falls Back with the intention of embarking at the end of their move, can the Cegorach's Jest Stratagem be used against that unit after it has moved within range of the transport, but before it embarks?

A: Yes.

Change the last paragraph to read:

'This army fulfills the requirements of two Super-heavy Detachments (High King Tybalt's Detachment and Baron Capulan's Detachment) and one Super-heavy Auxiliary Detachment (Sir Hekhtur). As it is also Battle-forged, its player receives twelve Command Points – the army receives 3 for being Battle-forged, High King Tybalt's Detachment contains three **TITANIC** units, so contributes 6 additional Command Points, whilst Baron Capulan's Detachment contains a single **TITANIC** unit, so contributes another 3. Sir Hekhtur is in a Super-heavy Auxiliary Detachment, so contributes no Command Points.'

FAQs

Q: Can Freeblades in Super-heavy Auxiliary Detachments have Qualities and Burdens?

A: Yes.

Q: Imagine a House Vulker model with the Firestorm Protocols Household Tradition with two ranged weapons, which targets two different enemy units, one of which is the closest enemy unit. I resolve the attacks against the closest enemy unit first, re-rolling hit rolls of 1 when doing so. If, as a result of those attacks, that enemy unit is destroyed, and the target of the next weapon is now the closest enemy unit, do I also get to re-roll hit rolls of 1 against that unit?

A: No. The ability to re-roll hit rolls of 1 only applies to the enemy unit that is the closest to the firing model at the 'Choose Target' step of the Shooting sequence.

Q: Do models with House Raven's Relentless Advance tradition suffer penalties to their hit rolls for Advancing and firing heavy weapons?

A: No. These weapons are treated as Assault weapons when such models Advance, and these models ignore penalties to their hit rolls for Advancing and firing Assault weapons.

*Q: Can a **FREEBLADE** model in a Super-heavy Auxiliary Detachment have Qualities and Burdens?*

A: Yes.

Q: If an Imperial Knight charges in its turn, destroys the unit it declared a charge against and then consolidates into a new unit that it did not declare a charge against, can it use the Death Grip Stratagem against that unit?

A: No. The Stratagem allows you to make an extra attack with that weapon, but because you charged this turn you can still only make that attack against a unit you declared a charge against.

*Q: If an Imperial Knight with a thunderstrike gauntlet (or the Paragon Gauntlet or Freedom's Hand) destroys an enemy **VEHICLE** or **MONSTER** and I roll a 4+ to inflict mortal wounds on a nearby unit, are those inflicted immediately, or after I have resolved my Knight's remaining attacks (if any)?*

*A: Pick the enemy unit as soon as you destroy the enemy **VEHICLE** or **MONSTER** unit and roll a 4+, but inflict the mortal wounds after you have resolved all your remaining attacks.*

Q: If a model is equipped with four shieldbreaker missiles, how many can it fire each turn?

A: One.

Official Update Version 1.4

Although we strive to ensure that our rules are perfect, sometimes mistakes do creep in, or the intent of a rule isn't as clear as it might be. These documents collect amendments to the rules and present our responses to players' frequently asked questions. As they're updated regularly, each has a version number; when changes are made, the version number will be updated, and any changes from the previous version will be highlighted in **magenta**. Where a version number has a letter, e.g. 1.1a, this means it has had a local update, only in that language, to clarify a translation issue or other minor correction.

FAQs

Q: Can I use the All is Dust ability to add 1 to invulnerable saving throws?

A: Yes, but only against attacks that have a Damage characteristic of 1.

Q: Can I use the All is Dust ability to add 1 to my saving throws against attacks that have a Damage characteristic of D3, or D6, but only inflict 1 damage?

A: No. The Damage characteristic is not '1'. Furthermore, the roll to inflict damage would occur after the saving throw would be taken (i.e. you cannot retroactively pass a saving throw).

Q: Can a Noise Marine use his Music of the Apocalypse ability if it flees the battlefield?

A: No. This ability can only be used when the model is slain.

Q: Can a Noise Marine that is slain use his Music of the Apocalypse ability to shoot any viable target, or does it have to target the unit that killed him?

A: It can shoot at any viable target.

Q: If several Noise Marines are slain in the same attack, can they each use their Music of the Apocalypse ability to throw a grenade, or can only one of them do so?

A: Each of them can throw a grenade.

Q: If a Noise Marine is slain whilst its unit is within 1" of an enemy unit, can he use his Music of the Apocalypse ability to shoot the unit that is within 1"?

A: Yes, but only with a Pistol.

*Q: If a Noise Marine is slain in the Fight phase, and he uses his Music of the Apocalypse ability to shoot an **IMPERIUM** unit and subsequently rolls a 6+ to hit, does the Death to the False Emperor ability then grant him an extra attack with that weapon, even though it's a ranged weapon?*

A: Yes. In this situation, make an extra hit roll against the target on a hit roll of 6+.

Q: What happens when a unit of Poxwalkers kills a Necron Warrior in the Fight phase? Do I still add a Poxwalker even though that Necron could reanimate?

A: A Poxwalker is added to the Poxwalkers unit as normal. At the start of the Necron player's next turn, they roll to reanimate that Necron Warrior as normal too (essentially both players could end up adding a model to their unit).

Q: If Skarbrand is within 8" of model that can FLY and has a minimum speed (such as a some Flyers), and that unit starts its Movement phase within 1" of an enemy unit, what happens? Is that unit destroyed because it cannot Fall Back and so cannot move its minimum speed?

A: Correct, the unit is destroyed.

Note, however, that some Flyers have an ability that, when used, means they no longer have a minimum speed that turn (e.g. the Stormraven Gunship's Hover Jet ability). If such a unit ends up in the situation described in the question, we recommend using their ability to avoid crashing into the ground!

Q: If I use Xirat'p's Sorcerous Barrage to automatically manifest a psychic power in a matched play game, can I still attempt to manifest the same power with a different psyker that turn?

A: No, unless that power was *Smite*.

Q: If a Burning Chariot takes its option to be accompanied by three Blue Horrors, does this mean I add three Blue Horror models from the Horrors datasheet and form a mixed unit?

A: No. This option is referring to the optional Blue Horror crew that come with the Burning Chariot kit and are placed on top of the chariot alongside the Exalted Flamer. If you have them, you simply get the benefits listed in the Burning Chariot's Irritating Chant ability.

Q: When I manifest the Warptime psychic power, can I select a unit that arrived on the battlefield as reinforcements this turn?

A: No.

Q: If I manifest the Warptime psychic power to move a unit in the Psychic phase, does that unit still suffer the -1 penalty for moving and firing Heavy weapons in the subsequent Shooting phase?

A: Yes.

Q: Can a HERETIC ASTARTES CHARACTER attempt to summon a unit of Daemons using a Daemonic Ritual, or can only DAEMON CHARACTERS attempt to do so?

A: Any CHAOS CHARACTER can attempt to do so. This includes HERETIC ASTARTES CHARACTERS.

Q: There is no datasheet for a Herald of Nurgle on a Palanquin of Nurgle – which datasheet should I use for this model?

A: Use the Epidemius datasheet from *Index: Chaos*.

Q: There is no datasheet for a Warsmith – which datasheet should I use for this model?

A: Use the Chaos Lord datasheet from *Index: Chaos*. The model should be armed with a power fist (note that whilst the model is technically equipped with a servo-arm, we feel that all of the Warsmith's attacks can reasonably be represented by making its attacks with its power fist).

Q: The points values for certain units is different in Index: Imperium 1 to the Dark Imperium Primaris Space Marines booklet? Which should I use?

A: Use the values printed in the Index book.

Q: If I use the Might of Heroes psychic power to bolster the Toughness characteristic of a model in a unit, which Toughness characteristic should be used if my opponent subsequently shoots the unit whilst the psychic power is still in effect?

A: In this case, use the Toughness characteristic of the majority of the models in the unit when the enemy makes wound rolls against it. If there is no majority, you may choose which of the values is used.

Q: If a model flees from an ADEPTUS ASTARTES unit, can an Apothecary use its narthecium to return a model to the unit?

A: No, the narthecium can only be used to return slain models to a unit.

Q: Is the cost of the combat shield included in the Company Champion and Company Champion on Bike’s points?

A: No. This (and all similar ‘other wargear’ found in the points values section) must be paid for in the same way as a model’s weapons.

Q: Is a Razorback firing a twin plasma gun destroyed if you roll a 1 to hit?

A: Yes.

ULTRAMARINES

Q: Does Roboute Guilliman’s ability to return to the battle via the Armour of Fate require the controlling player to have reinforcement points for it?

A: No.

Q: If Sergeant Chronus is commanding a vehicle which is reduced below half its starting number of wounds, do I continue to use Chronus’ Ballistic Skill of 2+ or does it degrade in line

with the vehicle’s damage table (Ballistic Skill usually worsens as the vehicle suffers damage)?

A: The vehicle continues to use Chronus’ Ballistic Skill of 2+.

BLOOD ANGELS

Q: When Astorath uses his Mass of Doom ability, do you roll one D6 and apply that result to all affected units, or do you roll for each unit separately?

A: Roll for each unit separately.

Q: Are the +1 Strength boosts from the Blood Chalice and Red Grail abilities cumulative, for a total of +2 Strength?

A: No. It’s only +1 Strength, even if the unit is within range of both these abilities.

SPACE WOLVES

Q: Can Svangir and Ulfgir embark on a transport?

A: Yes. Treat these models as if they were **SPACE WOLVES INFANTRY** for all rules purposes.

GREY KNIGHTS

Q: If a unit of Purifiers manifest the Smite psychic power whilst within range of a Brother-Captain’s Psychic Locus ability, what is the range of the resulting ‘cleansing flame’?

A: 6”.

Although we strive to ensure that our rules are perfect, sometimes mistakes do creep in, or the intent of a rule isn't as clear as it might be. These documents collect amendments to the rules and present our responses to players' frequently asked questions. As they're updated regularly, each has a version number; when changes are made, the version number will be updated, and any changes from the previous version will be highlighted in magenta. FAQs

*Q: Can a **RENEGADE KNIGHT CHARACTER** summon units of Daemons using the *Daemonic Ritual* ability?*

A: Yes.

*Q: If a Renegade Knight with a thunderstrike gauntlet destroys an enemy **VEHICLE** or **MONSTER** and I roll a 4+ to inflict mortal wounds on a nearby unit, are those inflicted immediately, or after I have resolved my Knight's remaining attacks (if any)?*

A: Pick the enemy unit as soon as you destroy the enemy **VEHICLE** or **MONSTER** unit and roll a 4+, but inflict the mortal wounds after you have resolved all your remaining attacks.

Q: If a model is equipped with four shieldbreaker missiles, how many can it fire each turn?

A: One.

You can include these models in the Detachment even if you are using the Battle Brothers matched play rule.'

If Yvraine, the Visarch or the Yncarne is included in a Detachment, all **AELDARI** units in that Detachment gain the **YNNARI** keyword. These units cannot use any of the following abilities, and are not considered to have them: Ancient Doom, Battle Focus, Rising Crescendo, Power From Pain. Instead, **YNNARI INFANTRY** and **BIKER** units gain the Strength from Death ability, as described below. The Detachment is still considered to be a Craftworlds, Harlequins or Drukhari Detachment, and so can use Craftworlds, Harlequins or Drukhari Stratagems, Warlord Traits and Relics respectively. Note that these units will not, however, gain any of the Detachment abilities listed in their respective codexes (such as The Path of War, Craftworld Attributes, Masque Forms, Drukhari Obsessions, etc.).'

FAQs

CRAFTWORLDS

Q: Do units with the Battle Focus ability still suffer the -1 penalty to their hit rolls for moving and firing Heavy weapons?

A: Yes.

Q: If Eldrad Ulthran passes two Psychic tests and manifests two psychic powers in his Psychic phase, does he get +1 or +2 to the Psychic test when attempting to manifest his third power?

A: +1.

Q: Does Fuegan gain the bonuses granted by his Unquenchable Resolve ability if he suffers a wound which is subsequently ignored due to his Last to Fall ability?

A: No.

Q: If, in a matched play game, I use the Swooping Hawk's Skyleap ability to remove the unit from the battlefield during the third or subsequent battle round, does the Tactical Reserves rule mean they count as destroyed?

A: No. The unit must already have arrived on the battlefield before the end of the third battle round in order to be able to use the Skyleap ability.

However, if the unit used its Children of Baharroth ability to set up in the skies during deployment, and it had not arrived by the end of third battle round, then it would count as destroyed in a matched play game due to the Tactical Reserves rule.

DRUKHARI

Q: If an Archon suffers a mortal wound, does its Shadowfield cease to function?

A: No.

Q: Can I use the Dodge ability of Wyches or Hekatrix Bloodbrides in the Shooting phase when my unit is shot by an enemy unit firing Pistols if my unit is within 1" of the firing unit?

A: No.

*Q: If I shoot a haywire blaster at a **VEHICLE** and roll a wound roll of 4, do I still inflict a mortal wound on that unit even though the wound roll might not be high enough to successfully wound it?*

A: Yes.

YNNARI

*Q: When an **AELDARI PSYKER** become Ynnari and gains the **YNNARI** keyword, do they also gain access to powers from the Revenant Discipline?*

A: No. Only Yvraine and the Yncarne generate their psychic powers from this discipline.

*Q: If a transport is destroyed whilst an **YNNARI** unit is embarked inside, can that unit make a Soulburst action after it disembarks?*

A: No.

*Q: Can any **YNNARI** unit embark on any **YNNARI** transport?*

A: No. Whilst both units have gained the **YNNARI** keyword, the Transport ability on the transport's datasheet does not change. So, for example, an **YNNARI** Starweaver can still only transport '6 <**MASQUE**> **INFANTRY** models'.

*Q: If I use a Soulburst action to charge with a **YNNARI** unit outside of the Charge phase, can my opponent's **CHARACTERS** perform a Heroic Intervention after I have made a charge move with my unit?*

A: No.

Q: Can Yvraine, the Visarch or the Yncarne have a Warlord Trait? If so, what Warlord Traits can they have?

A: Yes. They can only have one of the Warlord Traits listed in the *Warhammer 40,000* rulebook (unless you are playing an expansion such as Planetstrike, Stronghold Assault etc., in which case they would also have access to the Warlord Traits listed there).

Q: If I include Yvraine, the Visarch or the Yncarne in a Craftworlds, Drukhari or Harlequins Detachment, do I still have access to the all the Stratagems in that Detachment's codex (Craftworlds, Drukhari or Harlequins respectively)?

A: Yes, provided the Detachment in question is not an Auxiliary Support Detachment.

*Q: If Yvraine, the Visarch or the Yncarne is my Warlord, do I still get a free 'relic'? For example, if Yvraine is my Warlord and is part of a Harlequins Detachment, does she count as a **HARLEQUINS** unit for the purposes of giving one **HARLEQUINS CHARACTER** in my army an Enigma of the Black Library?*

A: No. You can, however, if your army includes the appropriate Detachment(s), use the Prizes from the Dark City, Treasures of the Craftworld and/or Enigmas of the Black Library Stratagems to give 'relics' to your Characters.

NECRONS

Q: How many wounds do Necron models have when they return to a unit using Reanimation Protocols?

A: They are returned with their full complement of wounds.

Q: Can Necrons that have fled the battlefield return using Reanimation Protocols?

A: No. This ability only allows models that were slain to return, not models that have fled.

You may find it useful to place Necron models that flee to one side as a reminder that they cannot return using their Reanimation Protocols ability.

Q: Can Quantum Shielding be used to prevent damage caused by mortal wounds?

A: No. Mortal wounds are inflicted one at a time, and as quantum shielding can never prevent a single point of damage from being suffered, it cannot prevent mortal wounds.

Q: If I use the Time's Arrow C'tan Power on a unit whose models have different Wounds characteristics, what happens?

A: A model of the owning player's choice is removed if the roll exceeds the highest Wounds characteristic in the unit.

FAQs

ORKS

Q: Is the Kustom Force Field ability an aura ability?

A: Yes.

Q: The Ork Battlewagon’s Mobile Fortress ability says the Battlewagon ‘ignores the penalty for moving and firing Heavy weapons’. Its Open-topped ability says that ‘restrictions and modifiers that apply to this model also apply to its passengers’. Does that mean that a unit embarked also ignores the penalty for firing Heavy weapons if the Battlewagon has moved?

A: No.

Q: Do Spanners have a separate points cost in units of Lootas and Burna Boyz?

A: No. They cost the same ‘points per model’ as the unit they are included in.

Q: What happens when a unit of Flash Gitz’ Gun-crazy Showoffs ability triggers, but the nearest enemy unit is not a viable target (e.g. it is not visible to the Flash Gitz, or it is within 1" of a unit from your army)?

A: If the nearest enemy unit is not a viable target then this ability has no effect this time.

Q: If I use a Stompa’s Psycho-Dakka-Blasta! Ability to shoot its supa-gatler several times, do I need to declare the targets of the attacks before making any attacks, or do I resolve the attacks one at a time?

A: Declare targets and resolve the attacks one at a time. Roll to see if the ammo has been expended before declaring the targets for second and subsequent attacks.

Q: How many points does a Boss Nob in a unit of Boyz cost?

A: 6.

Q: Can a Big Mek use his Big Mekaniak ability to repair a vehicle he is embarked inside? Can he repair another vehicle within 3" of the vehicle he is embarked inside?

A: No to both questions; he cannot repair vehicles while embarked inside a transport.

Q: What happens when a unit of Stormboyz declares a charge and it is within range of an Ork Warboss' Waaagh! ability at the start of the Charge phase (assuming the Stormboyz Advanced that turn) – do I still need to roll D6 to see if my Stormboyz unit suffers mortal wounds as described in their Full Throttle ability?

A: No. In this circumstance you can just use the Ork Warboss' ability to Charge (even though the unit Advanced) and you do not need to use the Full Throttle ability to do so (and so you avoid the risks involved).

T'AU EMPIRE

Q: If a T'au unit – e.g. XV8 Crisis Battlesuits or a Commander – uses the Manta Strike ability to set up in a Manta hold during deployment, does that also apply to any Drones that are accompanying that unit?

A: Yes. When the unit enters the fray, it and all its Drones are set up together as per the Mantra Strike ability. Once set up, they then become separate units.

Q: Can a unit of Pathfinders benefit from their own markerlights (e.g. if half the unit shoots their markerlights, and the other half shoot the same target with other weapons)?

A: Yes. Declare which models in the unit will fire markerlights at the same time you declare targets for the unit to shoot at, then resolve the models firing markerlights first, one at a time.

Q: Can models with an early warning override Support System use it to shoot at units that use psychic powers such as Gate of Infinity or Da Jump to set up within 12"?

A: Yes.

TYRANIDS

Q: Monstrous scything talons say that if the bearer has more than one pair it can make one additional attack. How many extra attacks does a Trygon, which has three pairs of monstrous scything talons, make?

A: It makes a total of one additional attack.

Q: The Onslaught psychic power says that the affected unit can Advance and fire in the same turn. Does this mean it gets to Advance again and then fire, or that it can fire even if it has Advanced this turn?

A: The unit can fire even if it has Advanced this turn. It does not get to Advance again.

Q: If a Hive Tyrant with lash whips is slain, which line of the damage table do I use when making its attacks before removing the model as a casualty?

A: Use the bottom line of the damage table, as if it still had one wound remaining.

Q: Can the Swarmlord use its Hive Commander ability on units that have no ranged weapons (the ability says 'instead of shooting')?

A: Yes.

Q: A Tervigon can only replace Termagants in a unit that is equipped with fleshborers. If those models were equipped with adrenal glands and/or toxin sacs, can those models still be replaced?

A: Yes.

GENESTEALER CULTS

Q: If I include a Detachment of ASTRA MILITARUM in a Genestealer Cult army using the Brood Brothers rule, do the ASTRA MILITARUM units gain the GENESTEALER CULTS keyword and the Cult Ambush ability?

A: No and no.

Q: Can I have a Battle-forged army that consists of one Detachment of GENESTEALER CULTS, one Detachment of ASTRA MILITARUM (using the Brood Brothers rule) and one Detachment of TYRANIDS?

A: Yes.

Q: If, in a matched play game, I use the Return to the Shadows Stratagem to remove one of my Genestealer Cult units from the battlefield during the fourth battle round, are they considered to be destroyed because of the Tactical Reserves matched play rule?

A: No.

CODEX: NECRONS

Official Update Version 1.1

Although we strive to ensure that our rules are perfect, sometimes mistakes do creep in, or the intent of a rule isn't as clear as it might be. These documents collect amendments to the rules and present our responses to players' frequently asked questions. As they're updated regularly, each has a version number; when changes are made, the version number will be updated, and any changes from the previous version will be highlighted in **magenta**. Where a version number has a letter, e.g. 1.1a, this means it has had a local update, only in that language, to clarify a translation issue or other minor correction.

ERRATA

Pages 87 and 99 – Catacomb Command Barge and Annihilation Barge, Abilities

Add the following ability:

'Hovering: Instead of measuring distances and ranges to and from this model's base, measure to and from this model's hull or base (whichever is closer).'

Page 95 – Canoptek Wraiths, Wraith Form

Change this ability to read:

'Models in this unit have a 3+ invulnerable save. During the Movement phase, models in this unit can move across models and terrain as if they were not there. Models in this unit can shoot and charge even if they Fell Back this turn.'

Page 98 – Monolith, Eternity Gate

Change the penultimate sentence of this ability to read:

'Set up the unit so that it is wholly within 3" of this model and more than 1" from any enemy models; the unit that has just been set up counts as having disembarked from a transport for all rules purposes.'

Page 102 – Night Scythe, Invasion Beams

Change the penultimate sentence of this ability to read:

'Set up the unit so that it is wholly within 3" of this model and more than 1" from any enemy models; the unit that has just been set up counts as having disembarked from a transport for all rules purposes.'

Page 112 – Methodical Destruction

Change the rules text to read:

'Use this Stratagem after a SAUTEKH unit from your army has attacked an enemy unit and the attack resulted in the enemy unit losing one or more wounds. Add 1 to hit rolls for attacks made by other SAUTEKH units from your army that target the same enemy unit this phase.'

Page 117 – Named Characters and Warlord Traits

Add the following sentence to the end of the paragraph: **'If either Illuminor Szeras or Anrakyr the Traveller is your Warlord, then replace the <DYNASTY> keyword in their Warlord Trait with NECRON.'**

Page 118 – Points Values

Move the entries for Deathmarks and Lychguard from the 'Troops' section into the 'Elites' section.

Q: Can a Triarch Stalker use its Targeting Relay ability to re-roll hit rolls of 1 for its own attacks after the first?

A: No.

ERRATA

Page 177 – Moving

Change the second paragraph to read:

'If the datasheet for a model says it can **FLY**, then during the Movement phase it can move across models and terrain as if they were not there.'

Page 178 – Re-rolls

Change this paragraph to read:

'Some rules allow you to re-roll a dice roll, which means you get to roll some or all of the dice again. If a rule allows you to re-roll a result that was made by adding several dice together (e.g. 2D6, 3D6, etc.) then, unless otherwise stated, you must roll all of those dice again. You can never re-roll a dice more than once, and re-rolls happen before modifiers (if any) are applied.'

Page 179 – Choose Unit to Shoot With

Change the fourth sentence to read:

'Unless otherwise noted, each model in the unit attacks with all of the ranged weapons it is armed with – if a model in the firing unit has any weapons that can only be used once per battle, you can choose whether or not the model will fire that weapon.'

Page 179 – Choose Ranged Weapons

Change the last sentence of the first paragraph to read:

'In either case, at the same time that you choose targets for the shooting unit's attacks, you must declare how you will split the shooting unit's shots; then resolve all the shots against one target before moving on to the next.'

Page 181 – Ignoring Wounds

Add the following as a boxout on this page:

Ignoring Wounds

Some units have abilities that allow them to ignore the damage suffered each time it loses a wound (e.g. Disgustingly Resilient, The Flesh is Weak and Tenacious Survivor). If a model has more than one such ability, you can only use one of those abilities each time the model loses a wound.'

Page 182 – Choose Targets

Change the third sentence of the second paragraph to read:

'In either case, at the same time that you choose targets for the unit's close combat attacks, you must declare how you will split the unit's close combat attacks; then resolve all attacks against one target before moving on to the next.'

Page 183 – Choose Melee Weapon

Change the second sentence to read:

'In addition to their other weapons, all models are assumed to be equipped with a close combat weapon, which has the following profile:'

Page 183 – Close combat weapon

Change the AP characteristic to read '0'.

Page 183 – Embark

Change the first sentence to read:

'If all models in a unit end their move within 3" of a friendly transport in the Movement phase, they can embark within it.'

Page 186 – The Warlord

Change the first sentence to read:

'Once you have mustered your army, nominate one of your models to be your Warlord (this cannot be a model with the Fortifications Battlefield Role).'

Page 200 – Deployment

Change this paragraph to read:

'After terrain has been set up, the Defender sets up three of their units wholly within their deployment zone – one of these units must have the Troops Battlefield Role. The Attacker then selects three of their units to serve as their patrol and sets them up wholly within their deployment zone – one of these units must have the Troops Battlefield Role. All other units arrive later in the battle using the Reserves rules (pg 194).'

Pages 204 and 206 – Deployment

Change the penultimate sentence to read:
‘The Attacker then sets up as many of their units as they wish wholly within their deployment zone.’

Page 214 – Organised Events

Replace this boxout with the one at the end of this document.

Page 215 – Sudden Death

Change point 2 to read:
‘If at the end of any turn after the first battle round, one player has no models on the battlefield, the game ends immediately and their opponent automatically wins a crushing victory. When determining if a player has any units on the battlefield, do not include any units with the Flyer Battlefield Role – these units cannot operate within a combat airspace indefinitely and they cannot hold territory without ground support. Furthermore, do not include any units with the Fortification Battlefield Role unless they have a unit embarked inside – even the most formidable bastion requires a garrison if it is to pose a threat.’

Pages 218, 219, 220, 221, 222, 223, 230, 231, 232, 233, 234, 235, 261 – Deployment

Change ‘A player’s models must be set up within their own deployment zone’ to read:
‘A player’s models must be set up wholly within their own deployment zone.’

Page 226 – Using Tactical Objectives

Add the following to the end of the paragraph:
‘Unless otherwise stated, a player controls an objective marker if they have more models within 3" of the centre of it than their opponent.’

Page 229 – 62, Witch Hunter

Change the rules text to:
‘Score 1 victory point if at least one enemy **PSYKER** unit was destroyed during this turn.’

Page 242 – Battlefield Role Slots

Change the last sentence of the second paragraph to read:
‘For example, in order to take a Battalion Detachment – which you can see on the facing page – you must select three units with the Troops Battlefield Role, and cannot include more than six Troops units in the Detachment.’

Page 242 – Understrength Units

Change the second paragraph to read:
‘If you are using Power Ratings, you must still pay the Power Rating cost as if you had a minimum-sized unit, even though it contains fewer models. If you are using points, you only pay the points for the models you actually have in an understrength unit (and any wargear they are equipped with). An understrength unit still takes up the appropriate slot in a Detachment. If you are playing a matched play game, you can only include an understrength unit in an Auxiliary Support Detachment.’

Page 243 – Battalion Detachment, Command Benefits

Change this Detachment’s command benefits to read ‘+5 Command Points.’

Page 243 – Brigade Detachment, Command Benefits

Change this Detachment’s command benefits to read ‘+12 Command Points.’

Page 248 – Woods

Change the last sentence of the first paragraph of rules text to read:
‘Other units only receive the benefit of cover if at least 50% of every model is obscured from the point of view of the shooting model.’

Page 248 – Ruins

Change the first paragraph of rules text to read:
‘Unless they can **FLY, VEHICLES, MONSTERS, CAVALRY** and **BIKERS** can only be set up or end their move on the ground floor of ruins.’

Change the third paragraph of rules text to read:
‘**INFANTRY** units that are entirely on or within a ruin receive the benefit of cover. Other units that are entirely on or within a ruin only receive the benefit of cover if at least 50% of every model is obscured from the point of view of the shooting model.’

Page 249 – Craters

Change the first paragraph of rules text to read:
‘**INFANTRY** units that are entirely within a crater receive the benefit of cover.’

Page 249 – Barricades

Change the first sentence of rules text to read:
‘When a model targets an enemy **INFANTRY** unit that has all of its models within 1" of a barricade, the target unit receives the benefit of cover if the attacking model is closer to the barricade than it is to the target.’

Page 250 – Imperial Statuary

Change the first paragraph of rules text to read:
‘Units within 3" of Imperial Statuary that are at least 25% obscured by it from the point of view of the shooting model receive the benefit of cover.’

Page 265 – Deployment

Change the first paragraph to read:
‘After the battlefield has been created, the Defender sets up their army wholly within their deployment zone. The Attacker then sets up their army wholly within their deployment zone.’

Page 269 – Deployment

Change the first paragraph to read:
‘The Defender sets up their army wholly within their deployment zone. The Attacker then sets up their army wholly within their deployment zone.’

Page 271 – Deployment

Change the penultimate sentence of the second paragraph to read:

'Models must be set up wholly within their own deployment zone, more than 9" from the centre of the battlefield.

FAQs

GENERAL QUESTIONS

*Q: Can I ever skip a phase, or part of a phase? For example, if my army contains no **PSYKERS**, can I skip my Psychic phase?*

A: No. You must play out all of the phases in a turn, and all parts of each phase. In the example you give, your opponent may have rules or Stratagems that are used in your Psychic phase, and so you cannot skip it.

Q: If a unit has a Strength characteristic of '-', but I need to use that characteristic to resolve a rule (e.g. shooting web pistols or webbers, the Death Grip Stratagem etc.) what value should I use?

A: Substitute the unit's Toughness characteristic for its Strength characteristic for the purposes of resolving such rules.

Q: What does within 1" mean? Does it mean any distance up to 1", or does it mean any distance up to and including 1"?

A: It means any distance up to and including 1".

Q: Can you clarify what the difference is between 'wholly within' and 'within' for rules purposes?

A: If a rule says it affects units/models that are 'wholly within' then it only applies if the entire unit/model is within. If it just says 'within', however, then it applies so long as any part of the unit/model is within.

For example, units gain the benefit of cover if every model in the unit is either on or within terrain. So long as all the models in that unit are either on or partially within the terrain, they gain the benefit of cover.

Q: When a rule refers to the 'nearest' unit/model, and two are equidistant, who decides which is the nearest?

A: Unless stated otherwise, the player controlling the unit that is using the rule decides.

For example, if a psyker manifested the *Smite* psychic power, and two enemy units were both exactly 4" away, the player controlling the psyker could choose which is the 'closest' and hence which suffers damage from the power.

Similarly, if in your Shooting phase an enemy **CHARACTER** and another enemy unit were both exactly 10" away from your firing model, you could choose which is the closest before resolving the shots – so you could choose to shoot the Character if you want. If two enemy Characters are equidistant from a firing model (and there is no other closer enemy unit) then the firing model's controller can choose which of the two Characters is closest before resolving the model's shots. Note that it cannot choose for them both to be the closest, so cannot split its fire between the two.

If neither player controls the origin of the rule in question (e.g. if a mission's rules include gigantic rocks that are crashing indiscriminately into the battlefield) then the players should roll off. Whoever wins decides which unit/model is nearest.

Q: Can I set up a unit, or finish any sort of move with a unit, so that its models form several separate groups (where each group consists of models from that unit that are within 2" horizontally and 6" vertically of at least one other model from their group)?

A: No. The unit must set up or finish any sort of move as a single group.

Q: If one of my units shoots an enemy unit in which only one model is visible, and I resolve the attacks one at a time, slaying that model before I have resolved all of my unit's attacks, what happens to the rest of the attacks – are they wasted?

A: No. You determine the number of attacks the firing unit will make against the target unit before any of those attacks are made (i.e. before any hit rolls are made). If you are resolving these attacks one at a time and your opponent removes the only visible model as a casualty, you still continue to resolve the remainder of the firing unit's attacks against that target.

Q: For rules that modify a weapon's characteristic(s), if that characteristic is a random value, how is the modification applied? For example, if a rule increases a weapon's Damage characteristic by 1, and the weapon's normal Damage characteristic is 'D3', what is its modified characteristic?

A: Any such modification is applied after the random result is rolled. In the example given, the modified characteristic would be D3+1.

*Q: Can a unit fire Overwatch at a **CHARACTER** if, when it declares its charge at them, there are other visible enemy models that are closer?*

A: Yes.

Q: Can I use the Command Re-roll Stratagem to retroactively re-roll a dice? For example, if I take a Psychic test, and then my opponent successfully Denies the Witch, could I use the Stratagem to try and increase the result of the original Psychic test?

A: No. You must use the Stratagem as soon as you have rolled your dice, before anything else occurs.

*Q: Do units that are not **INFANTRY** (**VEHICLES**, **MONSTERS**, etc.) gain the benefit of cover from woods, ruins etc. if they are at least 50% obscured by that piece of terrain but are not actually on or within it?*

A: No. Unless they are **INFANTRY, such a unit must meet the two following conditions to gain the benefit of cover:**

- All of its models must be either on or within the terrain.
- The unit must be at least 50% obscured from the point of view of the firer (note that it doesn't matter what is obscuring the target, only that it is obscured).

Q: If a rule allows me to re-roll Damage rolls of 1, and the Damage characteristic for a weapon is D3, do I re-roll the D6 rolls of 1 and 2 (which are halved to get the D3 result) or only the original D6 rolls of 1?

A: In this case, you re-roll the D3 result (so you re-roll rolls of 1 or 2 made on the D6).

*Q: Two enemy **INFANTRY** units are within 1" of each other and in the same piece of terrain. Do they both receive the benefit of cover against shooting attacks made with Pistols by the other unit?*

A: Yes.

Q: If my unit, which is equipped with Pistols, is within 1" of an enemy unit in the Shooting phase, but the closest enemy unit to some of the models in my unit is actually another enemy unit (i.e. not the enemy unit that is within 1" of my unit), which unit do those models shoot at?

A: Each individual model in your unit can shoot its Pistols at the closest enemy unit, whether it is the unit within 1" of the firing model's unit or not (in such circumstances, the firing model can shoot the closest unit even if other friendly units are within 1" of it).

Q: In the narrative play missions that use the Reserves mission rule, what happens with units such as Terminators that have abilities that allow them to be set up on the battlefield mid-battle? Can they be set up at the end of any Movement phase, as indicated by the ability, or can they only do so when they arrive from Reserves?

A: If the unit is deployed somewhere other than the battlefield (for instance, in a teleportarium chamber) then it is only set up on the battlefield when it arrives from Reserves.

Q: Some rules allow me to add models to a unit during the battle (e.g. the Poxwalker's Curse of the Walking Pox ability). Where are those models set up?

A: Unless otherwise stated, these new models are placed anywhere that is more than 1" from any enemy model and still within unit coherency of a model in its own unit that was itself on the battlefield at the start of the phase in which the new model was created. Note that if you cannot set up a new model on the battlefield because there is no room, it is simply not set up.

Q: Is it possible to use a Stratagem from one codex to target a unit from another?

A: Yes, so long as the unit the Stratagem is being used on has the appropriate keywords (note that the Stratagems in *Codex: Chaos Daemons* and *Codex: Tyranids* are specific exceptions to this, as discussed in the relevant FAQs and Errata).

For example, you can use the Tide of Traitors Stratagem from *Codex: Chaos Space Marines* on a unit of Cultists from a **DEATH GUARD** Detachment (from *Codex: Death Guard*) if your army has both an **ALPHA LEGION** Detachment and a **DEATH GUARD** Detachment in a single Battle-forged army.

Also note that the only requirement to have access to Stratagems is that you have a Detachment of the appropriate Faction.

*Q: For the purposes of the Strategic Discipline matched play rule, are Stratagems with identical names that appear in different codexes (e.g. 'Veterans of the Long War', which is a Stratagem in *Codex: Chaos Space Marines*, *Codex: Death Guard* and *Codex: Thousand Sons*) considered to be the same Stratagem?*

A: Yes. This means that, in matched play games, such Stratagems can only be used once per phase regardless of their source. For example, if you use the Veterans of the Long War Stratagem from *Codex: Chaos Space Marines*, you cannot in the same phase also use the Veterans of the Long War Stratagem from either *Codex: Death Guard* or *Codex: Thousand Sons*.

Q: For the purposes of the Tactical Reserves matched play rule, do units that act separately after they have been set up (e.g. Mek Gunz and their Grot Crew, T'au Battlesuits and their Drones, units that have the Vehicle Squadron ability, etc.) count as being a single unit, or several units?

A: Such units are a single unit for the purposes of the Tactical Reserves rule.

*Q: If both players have Stratagems or abilities that are used 'at the beginning of the first battle round but before the first turn begins' (for example, if both players use the Forward Operatives Stratagem from *Codex: Chaos Space Marines*), who resolves their abilities first?*

A: Unless the rule in question says otherwise, the players roll off and, starting with the winner, alternate resolving such rules one at a time.

Q: The rules for Advancing state that you roll a dice and add the result to the Move characteristic of the models in the unit 'for that Movement phase'. If, for whatever reason, I am able to Advance and then move normally with a unit in the same Movement phase, does the number I added to the unit's Move characteristic when it Advanced still apply when I make the normal move with the unit? For example, I have a unit whose Move characteristic is 6". It Advances, and I roll a 6, adding that to its Move characteristic to make 12". If it moves again in the same phase, its Move characteristic is still 12", so can it move up to 12" when making this move?

A: Yes. Note that a unit cannot Advance more than once in the same Movement phase, so the Move characteristic of a unit can only be modified once in this manner.

Q: If a unit with a minimum Move characteristic is affected by an ability which changes its Move characteristic, do I change both its minimum and maximum Move characteristics?

A: Yes. For example, an undamaged Hemlock Wraithfighter has a Move characteristic of 20"-60". If it was affected by the *Doombolt* psychic power, in the following Movement phase, its Move characteristic would be 10"-30".

Q: If a Stratagem instructs you to select a unit from your army at the start of the turn, can I choose one that is not yet on the battlefield (because it was, for example, set up in a teleportarium chamber during deployment)?

A: No, unless the Stratagem specifically says otherwise.

Q: If I set up a unit on the battlefield as reinforcements at the end of my Movement phase, can I then use any Stratagems that are used 'during your Movement phase'?

A: No, unless the Stratagem specifically says otherwise.

Q: If you use a Stratagem to remove a model from the battlefield and set it up again, does the model retain any persistent effects (for example, a bonus to one of its characteristics as a result of an ability)?

A: No.

*Q: If I use a Stratagem such as **Auspex Scan** or **Forewarned** to shoot with a unit 'as if it were the Shooting phase', does the restriction on not being able to target an enemy **CHARACTER** with a Wounds characteristic of 10 or less apply, even though that Stratagem is being used in the Movement phase?*

A: Yes.

Q: When a unit is chosen to make a charge move and fails the charge, do they still count as having charged? Specifically, can a unit that has failed a charge move be chosen to pile in – and potentially consolidate – towards the enemy?

A: A unit only counts as having charged if they made a charge move. If a charge fails, and no models make a charge move, they do not count as having charged. As such, they cannot be chosen to fight in the Fight phase (and so cannot pile in or consolidate) unless an enemy unit moves within 1" of them.

*Q: Can you perform **Heroic Interventions** in your opponent's charge phase even if they did not declare any charges that phase?*

A: Yes.

*Q: Can you ever perform a **Heroic Intervention** during your own turn?*

A: No.

Q: If a unit declares a charge against an enemy unit that is entirely on the upper level of a terrain feature such as a ruin, Sector Mechanicus structure, etc., but it cannot physically end its charge move within 1" of any models from that unit (either because there is not enough room to place the charging unit, or because the charging unit is unable to end its move on the upper levels of that terrain feature because of the expanded terrain rules for it – as with ruins, for example), does that charge fail?

A: Yes.

REINFORCEMENTS

Q: If a rule creates a new unit during the battle in a matched play game and adds them to my army, must I pay for the unit with my reinforcement points?

A: Yes (unless the rule itself says otherwise). If you don't have enough reinforcement points, you cannot add that unit to your army.

*Q: What about rules that transform one model into another model – such as turning an enemy **CHARACTER** into a Chaos Spawn; do I still need to pay reinforcement points to add the Chaos Spawn to my army?*

A: Again, yes (unless the rule itself says otherwise).

Q: What about rules that add models to existing units; do I need to pay reinforcement points for those models?

A: No (unless the rule itself says otherwise or adding the models would take the unit above its starting size).

The rules for reinforcements say that when a unit is set up on the battlefield as reinforcements, it cannot move or Advance further that turn, but can otherwise act normally (shoot, charge, etc.).

Q: Can such a unit make a charge move? Can it pile in and consolidate?

A: Yes to both questions – the unit can declare a charge and make a charge move, and if it is chosen to fight, it can pile in and consolidate.

*Q: Can such a unit move or Advance for any other reason e.g. because of an ability such as **The Swarmlord's Hive Commander** ability, or because of a psychic power such as **Warptime** from the **Dark Hereticus** discipline, or because of a Stratagem like **Metabolic Overdrive** from **Codex: Tyranids**, etc.?*

A: No.

*Some rules – such as **Early Warning Override** in **Codex: T'au Empire**, **the Ever Vigilant Stratagem** in **Codex: Adeptus Custodes**, and **the Auspex Scan Stratagem** in **Codex: Space Marines** – allow units to shoot at enemy units that have just arrived on the battlefield as reinforcements, as if it were the Shooting phase.*

*Q: If the unit arriving as reinforcements is a **CHARACTER**, can the firing unit shoot at it even if it is not the closest enemy unit?*

A: No – unless the firing unit is using a weapon that allows them to target a **CHARACTER** even if it is not the closest enemy unit. This takes place 'as if it were the Shooting phase', so all the normal restrictions of the Shooting phase still apply.

*Q: If the unit arriving as reinforcements has another unit embarked inside it which must disembark after it has been set up (such as units embarked within a **Drop Pod**, or a **Tyrannocyte**), can the firing unit shoot at the unit as it disembarks?*

A: No – though the unit can shoot at the **Drop Pod**/**Tyrannocyte** before the units inside disembark.

TRANSPORTS

*Q: Where **Detachments** say that you may include 1 **Dedicated Transport** for each other choice, what does that mean?*

A: It means that for each unit you include in the **Detachment** that does not have the **Dedicated Transport Battlefield Role**, you can include one **Dedicated Transport**.

Q: How do transports work with regards to disembarking units upon the transport's destruction?

A: Disembarking from a destroyed transport operates as follows:

1. If the transport has the Explodes ability (or equivalent) roll to see if it explodes and resolve any resulting damage to nearby units.*
2. All models inside immediately disembark following the standard rules for disembarkation.
3. Roll a number of D6 equal to the number of models disembarked in this fashion.
4. Each result of a 1 yields a slain model, and must be allocated to one of the models which disembarked; the controlling player may choose which model.
5. Remove the destroyed transport model.

* Note that if the transport does explode, units being transported are not affected as they are not yet on the battlefield.

For example, a Razorback is transporting a Tactical Squad of five models and one Space Marine Captain when it is destroyed. The Razorback rolls a 6 for its Explodes ability, inflicting D3 mortal wounds on each unit within 6". The six models inside now disembark, and six D6 are rolled. Two of the results are a 1, so two models are slain – the Space Marine player chooses two of the Space Marines from the Tactical Squad. The Razorback model is now removed from the battlefield.

Q: The Tactical Reserves matched play rule states that at least half the total number of units in my army must be set up on the battlefield during Deployment. If I have units embarked in a transport, do they count against the number of units I have to set up during Deployment? If, for example, I have a Valkyrie with three units embarked inside it that will arrive on the battlefield during the game, how many other units do I need to set up during Deployment to satisfy the Tactical Reserves rule?

A: Yes, embarked units count as units in your army, so must be counted when referring to this rule. If you have three units embarked inside a transport that will arrive during the game, you need to set up at least four other units on the battlefield during Deployment – equivalently, if you set up three units in a transport on the battlefield, you could set up four other units to arrive during the game.

Q: If a transport moves, do any models embarked inside it count as also having moved?

A: Yes.

Q: If a transport with the Open-topped ability (e.g. a Trukk) is within range of an aura ability, are units that are embarked upon that transport affected by that ability?

A: No.

Q: Can units embark inside a transport in a phase other than the Movement phase, such as when they are using the Fire and Fade Stratagem from Codex: Craftworlds, or when a unit performs a Soulburst action to move again?

A: No, unless the rule in question specifically states that the unit can embark inside a **TRANSPORT**.

UNIT AND WEAPON ABILITIES

Q: If I have a weapon that can target enemy units that are not visible to the firer (such as a mortar), can I shoot at an enemy CHARACTER that has a Wounds characteristic of less than 10 if it is not the closest enemy model?

A: No.

Q: Lots of aura abilities say they grant an ability to nearby units that are within range of any such models. Are the bonuses cumulative (i.e. if I am within range of two models with identical aura abilities, is the bonus doubled)?

A: Unless stated otherwise, no. The bonus for such an ability applies once if any (i.e. one or more) of these models are within range.

Q: Can abilities that are used 'instead of shooting', such as Smoke Launchers, be used if the model using them has Fallen Back, Advanced or has enemy models within 1" of it?

A: Yes. A model can use such an ability so long as it does not shoot – it does not matter whether this is because the model cannot shoot or it chooses not to.

Q: Some CHARACTERS have aura abilities, such as a Commissar's Aura of Discipline or a Chaplain's Spiritual Leader, that allow nearby friendly units to use the character's Leadership characteristic instead of their own. There are also lots of abilities that modify Leadership characteristics. Could you explain how these rules interact and in what order I should apply the substitution and any modifications?

A: You modify the Leadership characteristic first, then you use the character's Leadership characteristic instead (this means that the modification will not affect the unit unless the character's Leadership has also been modified).

Q: If both players have units with abilities that allow them to be set up during deployment 'after both armies are fully deployed' (e.g. Rattlings' Find the Best Spot), which player deploys their units first?

A: The players should roll off and, starting with the winner, they should alternate setting up such units.

Q: A number of abilities allow a unit to arrive during the battle and be set up more than 9" from any enemy models. If I use such an ability to set up as close as allowed towards an enemy unit and then select it as the target of the charge, what is the minimum charge distance I need to roll to make a successful charge (assuming no modifiers)?

A: 9.

Q: If a unit uses a rule that removes them from the battlefield and then sets them up again, such as the Teleport Homer ability or the Gate of Infinity psychic power, does that unit count as having moved for the purposes of moving and firing Heavy weapons?

A: Yes.

Q: If a unit starts its Movement phase within 1" of an enemy, can it use a rule that removes them from the battlefield and then sets them up again, such as the Teleport Homer ability or the Gate of Infinity psychic power?

A: Yes.

Q: If a unit starts its Movement phase within 1" of an enemy unit but elects to remain stationary, but subsequently uses a rule that removes them from the battlefield and then sets them up again, such as the Teleport Homer ability or the Gate of Infinity psychic power, is it considered to have Fallen Back this turn?

A: No.

Q: If a weapon such as a rail rifle has an ability that can inflict a mortal wound on the target in addition to the normal damage, but the 'normal damage' is subsequently saved, does the target still suffer the mortal wound?

A: Yes. Note that if the 'normal damage' was not saved, the wound would be allocated on the target unit first (and any resulting damage inflicted) before the mortal wound was inflicted.

Q: Some abilities and Stratagems confer extra bonuses each time a hit roll of, for example, 6+ is rolled. If a weapon has an ability that says 'this weapon automatically hits its target', do I still roll the hit rolls for those attacks in the hope of gaining such a bonus?

A: No, no hit rolls are made when resolving attacks with such weapons (and so they will never benefit from such a bonus).

Q: If a rule states that you can choose a unit to 'fight again', what does this mean exactly?

A: Repeat the entire Fight phase for that unit – i.e., choose to fight with the unit, pile in with that unit, choose its target, choose its melee weapon, resolve its close combat attacks, then consolidate with it.

Q: If a unit has an ability that allows it to fight twice in the Fight phase (e.g. Berzerkers), at what point during the Fight phase do they fight for the second time?

A: Treat each time the unit is able to fight as a separate unit selected to fight for all purposes.

So, if such a unit charged this turn, it will fight both times before any units that did not charge. If the unit did not charge this turn, then, after all units that did charge have fought, you can select this unit to fight with, then your opponent can select a unit to fight with, then you can select your unit to fight with for the second time (you need not consecutively use both of the unit's opportunities to fight – unless of course there are no other eligible units to select to fight with).

Note that any rule that interrupts the normal sequence of who fights first (such as the Counter-Offensive Stratagem, or the Slaanesh Daemon Quicksilver Reflexes ability) may be used to fight in between the unit's first and second 'fight'.

Q: If a unit that can fight twice in the Fight phase charges one enemy unit and destroys it during their first 'fight' in the subsequent Fight phase, and then consolidates into a second enemy unit, can they then attack that unit during their second 'fight'?

A: The charging unit can only make attacks against the second unit if it also declared a charge against it in its charge phase.

Q: If a unit has an ability that allows it to 'shoot twice' (e.g. Maugan Ra's Whirlwind of Death ability, or an Aggressor Squad's Fire Storm ability), do I need to shoot the same target each time or can I choose different targets? Do I need to resolve these two shooting attacks back to back?

A: Unless otherwise stated, you can shoot different targets each time it shoots. The attacks are resolved back to back – resolve the first shooting attack completely before resolving the second.

Q: If an ability instructs me to resolve an attack with a different characteristic (e.g. a Culexus Assassin's Etherium ability) does this happen before or after any other modifiers that also apply to that characteristic (e.g. the Drukhari Serpentin Combat Drug)?

A: When resolving such an attack, change the relevant characteristic to the new value before applying any modifiers to that new value.

In the example above, the Weapon Skill of the model attacking a Culexus Assassin is treated as being 6+ because of the Etherium ability, but the Serpentin then boosts it to 5+.

Q: If a model is equipped with two chainswords, do they get to make 2 extra close combat attacks?

A: Yes (though both must be made with a chainsword).

Q: Can abilities such as Disgustingly Resilient be used to ignore wounds if they were inflicted by mortal wounds?

A: Yes.

Q: If a model has an ability that halves damage suffered (rounding up) such as Marneus Calgar's Armour of Antiochus ability, how is that resolved when I am attacked by several attacks at once? Do I halve the total of all the damage suffered, or do I halve the damage inflicted by each attack separately?

A: Halve the damage suffered by each attack separately.

Remember that wounds are allocated one at a time. For example, if Marneus Calgar was wounded by four boltgun attacks (Damage characteristic 1) and each saving throw resulted in a failure, Calgar would suffer 0.5 wounds (which is rounded up to 1) four times, and would therefore lose 4 wounds.

Q: If an ability allows me to add 1 to saving throws, does it apply to both normal saving throws and invulnerable throws?

A: Yes, unless otherwise stated.

Remember that invulnerable saves are unaffected by the +1 bonus models receive to their saving throws for the benefits of cover.

Q: If a unit has an ability that allows it to attempt to Deny the Witch (e.g. the Flesh Hounds' Collar of Khorne, or a Canoptek Spyder's Gloom Prism), at what range can it attempt to Deny the Witch?

A: 24".

Q: A chainsword has the following ability: 'Each time the bearer fights, it can make 1 additional attack with this weapon'. If, for example, a Khorne Berzerker is armed with a chainsword and chainaxe, does he make two attacks with the chainaxe and then one additional attack with the chainsword, or does he have to split his attacks (making at least one attack with the chainsword) to be able to make the additional attack with the chainsword?

A: He can make two attacks with the chainaxe, then one additional attack with the chainsword.

Q: If an ability does not state its effects take place in a 'friendly' phase or 'enemy' phase, does that mean it works in every such phase (e.g. Mortarion's Host of Plagues ability, which takes effect 'at the start of the Fight phase')?

A: Yes.

Q: When a unit has mounts that have a melee profile – for example Thunderwolf Cavalry – can that unit make any attacks they wish to with that mount's melee profile, or can they only make the additional attacks noted in the weapon profile's abilities text?

A: You can only make the additional attacks noted in the abilities text.

MISSIONS

Q: When measuring distances to or from an objective marker, do you measure diagonally (i.e. counting both vertical and horizontal distances)?

A: Yes.

Q: Can a unit with the Fortifications Battlefield Role control an objective marker?

A: Yes, so long as it is considered to be a friendly unit (such as a **BUILDING**). Note that this means that Fortifications like Feculent Gnarlmaaws cannot control objective markers.

Q: Certain abilities and Stratagems are used 'before the battle'. When specifically is this?

A: The game begins when players start the Deployment step of a mission – all abilities and Stratagems that are used 'before the battle' must be used before then.

Remember that if both players have 'before the battle' abilities they wish to use, and the rules themselves do not explicitly say in which order they should be resolved, the players should roll off – the winner decides in what order they are resolved.

Q: Is the Deployment step of a mission considered to be a 'phase' for the purposes of rules?

A: No.

Note that this means that the Strategic Discipline matched play rule does not apply to Stratagems that are used during deployment and they can be used as many times as a player wishes, as long as they have enough Command Points to pay for them and the Stratagem does not explicitly say it can only be used 'once', or 'once per battle'.

Q: Some units have an ability that says that the models in the unit must be deployed at the same time, but thereafter each model is treated as a separate unit (e.g. Vehicle Squadron, Drone Support, etc.). For the purposes of missions that have the First Blood victory condition, if a unit has such an ability, does every model in it need to be destroyed for the opponent to claim First Blood, or just a single model?

A: The models in such units are each treated as individual units after they have deployed, so destroying a single one of them satisfies the First Blood victory condition.

Q: For the purposes of the Sudden Death rule, do units that are embarked within transports with the Flyer Battlefield Role count as being on the battlefield?

A: No.

Q: If I am playing the Spoils of War mission, and I generate the Priority Orders Received Tactical Objective, which then generates a Secure Objective X Tactical Objective, can my opponent achieve it and/or can I discard it?

A: Your opponent cannot achieve the Priority Orders Tactical Objective and you can discard it as you normally would.

Q: Are Teleport Homers or Infestation Nodes friendly models? Can they control objective markers?

A: No to both questions.

ORGANISED EVENTS

If you are using matched play for an organised event such as a tournament, we suggest using the table below. As well as a helpful guide to the size of the battlefield and game length, the number of Detachments each player can take in their army is restricted, as is the number of times a player's army can include a particular datasheet. Of course, if you are organising such an event, you should feel free to modify these guidelines to better suit your event's own needs, schedule, etc. You can only include the same datasheet in a Battle-forged army up to a maximum number of times, depending upon the points limit for that game, as described below.

ORGANISED EVENT GUIDELINES

POINTS LIMIT	NUMBER OF DETACHMENTS	NUMBER OF TIMES EACH DATASHEET CAN BE INCLUDED*	BATTLEFIELD SIZE	GAME LENGTH
Up to 1,000	Up to 2 per army	Up to 2 per army	4' x 4'	Up to 2 hours
1,001-2,000	Up to 3 per army	Up to 3 per army	6' x 4'	2 to 3 hours
2,001-3,000	Up to 4 per army	Up to 4 per army	8' x 4'	3 or more hours

* This does not apply to units with the Troops or Dedicated Transport Battlefield Role, nor does it apply to any units that are added to your army during the battle that cost reinforcement points.

ORGANISED EVENTS

The updated Organised Events guidelines table restricts the number of times a particular datasheet can be included in your army. A few common questions have arisen from this:

Q1) Some units, like Carnifexes and Leman Russ Battle Tanks, can contain up to 3 models each, but after they are set up on the battlefield, they each become individual units. How many of these models can I include in my army if I'm using the Organised Events guidelines for, say, a 2,000 point game?

A1) You can include up to 3 units in a 2,000 point game, meaning you could include up to 9 of these models.

Q2) Do Tactical Drones that are taken as upgrades for certain T'au Empire units (e.g. XV8 Crisis Battlesuits, XV25 Stealth Battlesuits etc.) count as units for the purposes of the Organised Events guidelines, and so count towards the number of Tactical Drones units (i.e. the Fast Attack choice) I can include?

A2) No.

Q3) Are the Daemon Prince datasheet from Codex: Chaos Space Marines, the Daemon Prince of Nurgle datasheet from Codex: Death Guard, and the Daemon Prince of Tzeentch datasheet from Codex: Thousand Sons all considered different datasheets for the purposes of the Organised Events guidelines?

A3) Yes.

FAQs

Q: If I replace a Wolf Guard Terminator's storm bolter with a cyclone missile launcher and storm bolter from the Terminator Heavy Weapons list (as per the third bullet point), can I subsequently replace the new storm bolter with an item from the Combi-weapons or Terminator Melee Weapons list (as per the second bullet point)?

A: Yes.

Q: Does the Lone Wolf Stratagem have to be used at the end of the phase in which one of my units is reduced to its last model?

A: No, this can be used at the end of any phase. This means you can wait until after the unit has taken any Morale test it is required to, and use this Stratagem at the end of the Morale phase, if you wish.

Q: Are the effects of Stratagems such as Cloaked by the Storm and Howl of the Great Pack considered to be aura abilities for the purpose of the Saga of Majesty Warlord Trait?

A: Yes.

Q: If Ragnar Blackmane is my army's Warlord, do Svangir and Ulfgir also gain the benefit of Saga of the Warrior Born Warlord Trait?

A: Yes; this Warlord Trait affects the unit, of which Svangir and Ulfgir are a part.

Q: Can the Armour of Russ relic force a charging unit to attack after all other units have done so?

A: Yes, unless that chosen unit has an ability that allows it to fight first in the Fight phase, in which case it instead fights as if it didn't have that ability.

WARLORD TRAITS

The champions of the Space Wolves have crafted their sagas over centuries of war against the enemies of the Imperium. Each is a living legend, an example to their warriors and a beacon of hope in a benighted galaxy.

If a **SPACE WOLVES CHARACTER** is your Warlord, he can generate a Warlord Trait from the following table instead of the one in the *Warhammer 40,000* rulebook. You can either roll on the table below to randomly generate a Warlord Trait, or you can select the one that best suits his temperament and preferred style of waging war.

Like other Warlord Traits, a Space Wolves saga grants a powerful advantage and is active on your Warlord at all times. However, unlike other Warlord Traits, from the end of a phase in which your Warlord performs a deed of legend (as detailed within the saga), the saga also affects friendly **SPACES WOLVES** units whilst they are within 6" of your Warlord. This effect lasts for the rest of the battle.

06 RESULT

1 SAGA OF THE WARRIOR BORN

Endowed with preternatural prowess, the Warlord strikes swift and savage at all who stand before him.

You can always choose for a unit affected by this saga in the Fight phase to fight first even if they didn't charge. If the enemy has units that have charged, or that have a similar ability, then alternate choosing units to fight with, starting with the player whose turn is taking place.

Deed of Legend: Slay an enemy **CHARACTER** with your Warlord.

2 SAGA OF THE WOLF-KIN

The Warlord's savage battle howl has a primal potency, sending the predatory instincts of his lupine kin into overdrive.

If a unit is affected by this saga in the Fight phase, add 1 to the Attacks characteristic of all its models if it made a charge move, was charged, or performed a heroic intervention earlier in the same turn.

Deed of Legend: Slay a total of five models in the Fight phase with your Warlord (keep a tally from turn to turn).

3 SAGA OF MAJESTY

The Warlord speaks with the wisdom of the ages, inspiring his men to acts of valour and greatness.

If a unit is affected by this saga, they automatically pass Morale tests. In addition, if your Warlord is a **CHARACTER**, increase the range of any aura abilities they have by 3" (e.g. the Great Wolf and Jarl of Fenris), excluding Explodes, Healing Balms, Battlesmith, this Warlord Trait, abilities of Relics of the Fang and effects of psychic powers.

Deed of Legend: Slay the enemy Warlord with your Warlord.

4 SAGA OF THE BEASTSLAYER

This hero has slain some of the mightiest beasts in the galaxy. Such a hero embodies Russ' strength and courage.

Add 1 to wound rolls for attacks made by a unit affected by this saga that target a **MONSTER** or **VEHICLE**.

Deed of Legend: Slay an enemy **MONSTER** or **VEHICLE** with your Warlord.

5 SAGA OF THE HUNTER

A master of the chase, ever has this hero tracked his prey from the shadows. Such a warrior exemplifies his Primarch's hunting instincts.

A unit affected by this saga in your Charge phase can charge even if it Advanced earlier in the turn.

Deed of Legend: Successfully charge an enemy unit with your Warlord.

6 SAGA OF THE BEAR

When this hero plants his feet firmly, he stands as strong as the mountains of Asaheim.

Roll a dice each time a model affected by this saga loses a wound; on a 6, that model does not lose a wound. This saga has no effect on models with a similar ability (e.g. Bjorn the Fell-Handed's Legendary Tenacity ability).

Deed of Legend: Successfully pass a saving throw for your Warlord.

NAMED CHARACTERS AND WARLORD TRAITS

The mightiest warriors of Fenris are renowned as much for their methodology as they are for their deeds on the battlefield. If one of the following named characters is your Warlord, they must be given the associated Warlord Trait shown below.

NAMED CHARACTER	WARLORD TRAIT
Arjac Rockfist	Saga of the Bear
Bjorn the Fell-Handed	Saga of Majesty
Canis Wolfborn	Saga of the Wolfkin
Harald Deathwolf	Saga of the Wolfkin
Krom Dragongaze	Saga of the Warrior Born
Logan Grimnar	Saga of Majesty
Njal Stormcaller	Saga of Majesty
Ragnar Blackmane	Saga of the Warrior Born

FAQs

Q: In Index: Xenos 2, the Stimulant Injector was a piece of wargear that I could purchase for certain T'au Empire units. In Codex: T'au Empire, the Stimulant Injector is no longer a wargear option, but instead there is a Stimulant Injector Stratagem. Can I continue to use the Index: Xenos 2 datasheets in order to purchase Stimulant Injectors for my units, as per the 'What datasheet rules should I use?' flowchart?

A: No. You cannot purchase Stimulant Injectors anymore and the rules for Stimulant Injectors as presented in *Codex: T'au Empire* (i.e. the Stratagem) take precedence.

Q: With regards the Cadre Fireblade's Volley Fire ability, what exactly is meant by 'may fire an extra shot'?

A: It means the player can make one more hit roll for each model.

Q: If you set up a Devilfish transport with a unit of Pathfinders embarked inside, and the Pathfinders are accompanied by a Tactical Drone, at which point does the Pathfinder unit count as 'set up' for the purposes of the Drone Support ability? I.e. does the Drone become a separate unit when the Devilfish is set up, or does it become a separate unit when the Pathfinder unit disembarks?

A: The unit of Pathfinders counts as having been set up embarked within the Devilfish, so the Drone becomes a separate unit as soon as the Devilfish is set up.

*Q: Can an **INFANTRY** unit with accompanying Drones be deployed within a Fortification if the Drones cannot embark inside that Fortification?*

A: Yes, but the Drones themselves cannot embark inside the Fortification – instead they must be set up within 2" of the Fortification when their unit is deployed within it.

Q: The multi-tracker allows you to re-roll hit rolls of 1 in the Shooting phase for a model equipped with it, as long as it fires all of its weapons at the same target. What if the target is out of range for one or more of the firing model's weapons? Do you have to pick a target that can be fired at by all of the firing model's weapons?

A: No, the intent is that any weapons that the firing model can legitimately fire must be fired at the same target.

Q: Can I use the Breach and Clear! Stratagem against a unit that has 3 or more markerlight tokens on it?

A: Yes.

Q: Is the Experimental Weaponry Stratagem used before or after I determine how many shots are fired by a weapon?

A: Before.

Q: How does the Saviour Protocols ability work when a T'au Empire unit is hit and wounded by a powerful weapon, like a lascannon, when it is near to some friendly Drones?

A: Let's imagine a **T'AU SEPT** unit is targeted by a model firing a lascannon whilst a friendly **T'AU SEPT DRONE** unit is within 3" of it. The hit roll and wound rolls for the attack made with the lascannon are both successful. The T'au Sept player then rolls one D6, scoring a 3 – this is more than 2+ so they choose to allocate the wound caused by the lascannon's attack to the nearby Drone unit instead. Instead of resolving the damage normally against the Drone unit (i.e. taking a saving throw, and if it is failed, inflicting damage equal to the weapon's Damage characteristic – in this case D6), the Drone unit suffers 1 mortal wound, typically resulting in the destruction of a single Drone model.

Q: For the purposes of the Saviour Protocols ability, what exactly constitutes an attack?

A: In this context, it is an attack made with a ranged or melee weapon.

Q: Is a longshot pulse rifle considered a pulse rifle for the purposes of volley fire?

A: No.

*Q: If a **COMMANDER** uses their Master of War ability to declare either Kauyon or Mont'ka, and a friendly **<SEPT>** unit that was more than 6" from that Commander at the beginning of the turn subsequently moves within 6" of that Commander during that turn, does that **<SEPT>** unit then benefit from Kauyon or Mont'ka?*

A: No. Kauyon and Mont'ka only affect those units that are within 6" of the Commander when the ability was used at the start of the turn.

THE BIG FAQ 2 2018

Finalised Matched Play Rules

The Battle Brothers matched play rule was introduced as a beta version back in Spring 2018. This is now the final form of this matched play rule:

BATTLE BROTHERS

All of the units in each Detachment in your Battle-forged army must have at least one Faction keyword in common. In addition, this keyword cannot be **CHAOS**, **IMPERIUM**, **AELDARI**, **YNNARI** or **TYRANIDS**, unless the Detachment in question is a Fortification Network. This has no effect on your Army Faction.

In addition, the following two matched play rules as confirmed in the Spring update continue to apply.

PSYCHIC FOCUS

With the exception of *Smite*, each psychic power can be attempted only once per turn, rather than once per psyker per turn. In addition, unless the psyker attempting to manifest *Smite* has either the Brotherhood of Psykers (see *Codex: Grey Knights*) or Brotherhood of Sorcerers ability (see *Codex: Thousand Sons*), you must add 1 to the warp charge value of *Smite* for each attempt (whether successful or not) that has been made to manifest *Smite* during a given Psychic phase, to a maximum warp charge value of 11.

For example, if an **ORK** psyker attempts to manifest *Smite* during a Psychic phase in which two other psykers have already attempted to manifest *Smite*, then the warp charge value of *Smite* is 7 for that attempt (note that if the result of the psyker's Psychic test is more than 10, it still inflicts D6 mortal wounds instead of D3 as normal).

TARGETING CHARACTERS

An enemy **CHARACTER** with a Wounds characteristic of less than 10 can only be chosen as a target in the Shooting phase if it is both visible to the firing model and it is the closest enemy unit to the firing model. Ignore other enemy **CHARACTERS** with a Wounds characteristics of less than 10 when determining if the target is the closest enemy unit to the firing model.

This means that if any other enemy units (other than other **CHARACTERS** with a Wounds characteristics of less than 10) are closer, whether they are visible or not, then the enemy **CHARACTER** cannot be targeted.

Beta Matched Play Rules

TACTICAL RESERVES

Following feedback, we are changing the Tactical Reserves beta matched play rule proposed in the Spring 2018 update, which was itself an update to an existing matched play rule in the *Warhammer 40,000* rulebook. The original wording in the *Warhammer 40,000* rulebook restricted the number of units that could arrive during a game to half your army, but the intent was 'half of your army's strength'. The first beta version of this rule clarified this to be half the Power Level of your army, but as matched play games typically use points values instead of Power Ratings, we have clarified that this should instead be half the points value of your army.

Even when limited to half your army, the ability to arrive on the battlefield mid-game remains very powerful, enabling units that can do so to arrive where they will be most effective whilst granting them immunity from attacks until they are on the battlefield. Armies that use a heavy proportion of 'reinforcement units' continue to dominate on many gaming tables, which is why we felt it necessary to rein in the power of these abilities in Spring 2018. However, our original beta rule, which limited the units that arrived as reinforcements during the first battle round to being set up within their own deployment zone, received a lot of mixed feedback. Whilst it did help to rein in the power of some armies that used a heavy proportion of reinforcement units, it also raised a lot of questions from players regarding which units, abilities, powers and so on were affected. Some players felt it was unfair that all of their units were restricted, whilst all of their opponent's units were exempt. Perhaps the biggest criticism we received, though, was that the rule seemed to break many players' suspension of disbelief, as they could not understand the background reasons behind it – what was the rule representing on the battlefield?

As a result, we are proposing a new version of this beta rule that is designed to rein in the power of reinforcement-heavy armies whilst also maintaining a more narrative theme. To that end, units that arrive as reinforcements must now wait until the second battle round to do so – they are reserves that arrive to reinforce your army mid-battle, not reinforce it before your opponent has had a chance to move any of their own models.

We also felt, because it was so different, that we should rerelease this as a new beta matched play rule, rather than enshrine it in the rules before the wider community has had a chance to provide adequate feedback. We have also removed the exemption that Genestealer Cults had in the previous beta version of this rule – rest assured this has been taken into account for *Codex: Genestealer Cults*, which is currently in development.

TACTICAL RESERVES

Instead of being set up on the battlefield during Deployment, many units have the ability to be set up on teleportariums, in high orbit, in ambush, etc., in order to arrive on the battlefield mid-game as reinforcements. When setting up your army during Deployment for a matched play game, at least half the total number of units in your army must be set up on the battlefield, and the combined points value of all the units you set up on the battlefield during Deployment (including those that are embarked within **TRANSPORTS** that are set up on the battlefield) must be at least half of your army's total points value, even if every unit in your army has an ability that would allow them to be set up elsewhere.

Furthermore, in matched play games, units that are not placed on the battlefield during deployment in order to arrive on the battle mid-game as reinforcements cannot arrive on the battlefield during the first battle round.

Finally, any unit that has not arrived on the battlefield by the end of the third battle round in a matched play game counts as having been destroyed.

Related Errata

If you are using the Tactical Reserves beta matched play rule, the following errata apply:

Codex: Space Marines, page 197 – Strike From the Shadows

Change this Stratagem to read:

‘Use this Stratagem when you set up a **RAVEN GUARD INFANTRY** unit from your army during deployment. At the start of the first battle round but before the first turn begins, you can move that unit up to 9". It cannot end this move within 9" of any enemy models. If both players have units that can move before the first turn begins, the player who is taking the first turn moves their units first.’

Codex: Chaos Space Marines, page 160 – Forward Operatives

Change this Stratagem to read:

‘Use this Stratagem when you set up an **ALPHA LEGION INFANTRY** unit from your army during deployment. At the start of the first battle round but before the first turn begins, you can move that unit up to 9". It cannot end this move within 9" of any enemy models. If both players have units that can move before the first turn begins, the player who is taking the first turn moves their units first.’

Codex: Adeptus Mechanicus, page 98 – Clandestine Infiltration

Change this Stratagem to read:

‘Use this Stratagem when you set up a **STYGIES VIII** unit from your army during deployment. At the start of the first battle round but before the first turn begins, you can move that unit up to 9". It cannot end this move within 9" of any enemy models. If both players have units that can move before the first turn begins, the player who is taking the first turn moves their units first.’

Codex: Craftworlds, pages 91 and 94 – Illic Nightspear and Rangers, Appear Unbidden

Change the last sentence of this ability to read:

‘At the end of any of your Movement phases, this unit can emerge from the webway – set this unit up anywhere on the battlefield that is more than 9" away from any enemy models.’

Index: Xenos 1, page 79 – The Yncarne, Inevitable Death

Change the first sentence of this ability to read:

‘When you set up the Yncarne, it can be set up in waiting rather than on the battlefield.’

New Beta Matched Play Rules

We are also introducing the following two new beta matched play rules: Prepared Positions and Tactical Restraint. As with our previous beta matched play rules, do let us know what you think.

Prepared Positions is a Stratagem that is available to the player who has the second turn in the game. Often, taking the first turn gives a player a distinct advantage, enabling them to target and shoot their opponent's units before they can react. This Stratagem gives the player who has the second turn a chance to better weather that storm.

Tactical Restraint is a new rule that limits the rate at which Command Points can be regenerated throughout the battle via Warlord Traits, relics, etc. With the increase to the total number of Command Points available to all armies that we introduced in the Spring update – which increased the number of Command Points that Battalions and Brigades gave a player – these types of rules were made commensurately better. This matched play rule attempts to correct this, ensuring that your pool of Command Points remains a precious resource.

PREPARED POSITIONS

The player who has the second turn in the first battle round has access to the following Stratagem:

2CP

PREPARED POSITIONS

Stratagem

Use this Stratagem at the start of the first battle round, before the first turn begins. Until the end of the first turn, all units from your army that are wholly within your Deployment Zone, other than **TITANIC** units, receive the benefit of cover, even while they are not entirely on or in a terrain feature. A unit that is already receiving the benefit of cover gains no additional benefit from this Stratagem.

TACTICAL RESTRAINT

There are several Warlord Traits, Relics and abilities that give you a chance to gain or refund Command Points when you or your opponent either use a Stratagem or spend Command Points to use a Stratagem. In matched play games, each player can only gain or have refunded a total of one Command Point per battle round as the result of such rules, regardless of the source.

This does not apply to the Moment Shackle or the Seven-fold Chant abilities, or to or the Player of the Twilight Warlord Trait – in these cases, the ability/Warlord Trait can refund or gain the player more than 1 Command Point if the Stratagem used cost 2 or more Command Points to use, but once any Command Points have been gained as a result of the rule neither it, nor any similar rule, can be used to gain any more Command Points until the next battle round. Also note that this does not apply to Command Points that are gained or refunded as specifically instructed on Stratagems (e.g. Feeder Tendrils, Agents of Vect, etc.).

Interim Balance Review

Further to the above matched play rules, we have decided to make a number of small errata to enhance the balance of Warhammer 40,000, based on community feedback. As errata, these are effective immediately, and detailed below.

STRATAGEMS

The Warp Surge Stratagem appears to be too effective, enabling a potential invulnerable save of 2+. As a result, we are making a small change to this Stratagem. This change appears in the *Codex: Chaos Daemons* errata, but is shown below for convenience.

Codex: Chaos Daemons, page 126 – Warp Surge

Change the rules text of this Stratagem to read:

‘Use this Stratagem at the start of any phase. Select a unit of **DAEMONS** from your army; until the end of the phase, you cannot re-roll saving throws for this unit, but its invulnerable save is improved by 1 (to a maximum of 4+).’

The following Stratagems appear to be too effective. As a result, we are increasing their Command Point cost by 1 each. These changes appear in the respective errata documents, but are shown below for convenience.

Codex: Blood Angels, Page 136 – Upon Wings of Fire

Change the Command Point cost of this Stratagem to 2CP.

Codex: Imperial Knights, Page 109 – Oathbreaker Guidance System

Change the Command Point cost of this Stratagem to 3CP.

Codex: Imperial Knights, Page 111 – Order of Companions

Change the Command Point cost of this Stratagem to 3CP.

Codex: Imperial Knights, Page 111 – Our Darkest Hour

Change the Command Point cost of this Stratagem to 3CP.

Codex: Drukhari, Page 120 – Agents of Vect

Change the Command Point cost of this Stratagem to 4CP.

Note also that the Agents of Vect Stratagem has received an errata. This change appears in the *Codex: Drukhari* errata document, but is shown below for convenience.

Codex: Drukhari, Page 120 – Agents of Vect

Change the final sentence of this Stratagem to read:

‘This Stratagem cannot be used if there are no **KABAL OF THE BLACK HEART** units from your army on the battlefield, and cannot be used to affect Stratagems used ‘before the battle’ or ‘during deployment’.’

FAQs

Q: Do I score a victory point for Slay the Warlord if my opponent targets their Warlord with The Flesh-Change?
A: Yes.

Q: When a model's datasheet states that it knows, for example, three psychic powers from the Discipline of Change and/or Dark Hereticus discipline, does this mean I can choose six psychic powers for them in total?

A: No, it means you can choose three psychic powers for them, in one of the following combinations:

- 1) three from the Discipline of Change.
- 2) three from the Dark Hereticus discipline.
- 3) one from one discipline and two from the other.

Q: The Brotherhood of Sorcerers ability increases the range of psychic powers by 6". If a psychic power has a secondary effect that has a range (such as Infernal Gateway, which has an initial range of 12" but then affects all other units within 3"), does the range increase apply to the initial range, the secondary range, or both?

A: It only applies to the initial range; so in the case of *Infernal Gateway*, you would identify the nearest visible enemy model within 18" of the psyker, rather than within 12". That model's unit and every other unit within 3" of that model would then suffer D3 mortal wounds.

Q: Can I replace the Smite psychic power when using the Chaos Familiar Stratagem?

A: Yes.

Q: If I manifest the Gift of Chaos psychic power, and target a unit whose models have different Toughness characteristics, which one should I use?

A: Use the highest Toughness characteristic in the target unit.

In the rules described in this section we often refer to 'Tyranids units'. This is shorthand for any **TYRANIDS** unit that also has the <HIVE FLEET> keyword. A Tyranids Detachment is therefore one which only includes units with both the **TYRANIDS** and <HIVE FLEET> keyword.

Note that although Genestealer Cults are devoted to the Hive Mind and will willingly fight alongside their xenos masters, they deviate significantly in terms of organisation and tactics, not to mention physiology! **GENESTEALER CULTS** units therefore cannot make use of any of the rules listed in this section (this includes the Detachment abilities, Stratagems, bio-artefacts, psychic powers, Warlord Traits and Tactical Objectives described in this section), and instead have their own rules.'

FAQs

Q: Does the Instinctive Behaviour ability apply to Tyranids units whilst they are embarked within a Fortification?

A: Yes – that means that you must subtract 1 from hit rolls made for that unit when shooting at any target other than the nearest visible enemy unit.

Q: When a unit is set up in a locale other than the battlefield, can they change that locale (other than to be set up on the battlefield)? For example, if a unit is set up ‘within the tunnels’ as part of The Enemy Below, must they be set up on the battlefield following that Stratagem, or can they be set up in another fashion?

A: They cannot change their locale. In the example, they can only be set up on the battlefield following the conditions of The Enemy Below.

Q: When a unit is chosen to make a charge move and fails the charge, do they still count as having charged? Specifically, can a unit that has failed a charge move be chosen to pile in – and potentially consolidate – towards the enemy?

A: A unit only counts as having charged if they made a charge move. If a charge fails, and no models make a charge move, they do not count as having charged. As such, they cannot be chosen to fight in the Fight phase (and so cannot pile in or consolidate) unless an enemy unit moves within 1" of them.

Q: Can a unit ever Advance twice in a single phase?

A: No.

Q: If a unit has Advanced in a phase, and is given the opportunity to move again in the same phase, what is their Move characteristic?

A: Their Move characteristic for the second move would still be the value as modified from the Advance.

For example, if a unit with a Move characteristic of 5" Advances in a Movement phase, and the result of the dice rolled for the Advance is 4, its Move characteristic would be modified for that phase to 9". As such, if it was given the opportunity to move again in that phase, its Move characteristic would still be 9".

Q: If a new unit is added to an army – for example as a result of the Sporefield or Call the Brood Stratagems – is it part of a Detachment?

A: No.

Q: How many heavy venom cannons and stranglethorn cannons can a model be armed with?

A: A model can be armed with either one heavy venom cannon or one stranglethorn cannon, not one of each.

Q: Can a Broodlord use the Genestealers’ Infestation ability to be set up during the battle near an infestation node?

A: No.

Q: If you use a Maleceptor’s Psychic Overload ability, can that Maleceptor attempt to manifest any psychic powers in that Psychic phase?

A: No.

Q: If a model has more than one pair of scything/monstrous scything/massive scything talons, does it make 1 additional attack with one of those pairs, or 1 additional attack with each of those pairs?

A: 1 additional attack with one of those pairs.

Q: If a model has more than one ‘pair’ of boneswords, does it make 1 additional attack with one of those pairs, or 1 additional attack with each of those pairs?

A: 1 additional attack with one of those pairs.

Q: Do Hive Fleet Jormungandr units gain the cover bonus twice if they are in ruins?

A: No.

Q: Does the Psychic Barrage Stratagem prevent all three units of Zoanthropes from attempting to manifest psychic powers that turn?

A: Yes.

*Q: If a Genestealer, **LICTOR**, Toxicrene or Venomthrope from my army attacks an enemy **CHARACTER** in the Fight phase, reducing it to 1 wound, and I use the Implant Attack Stratagem to kill that character, can I then use the Feeder Tendrils Stratagem?*

A: Yes.

Q: If I use the Metabolic Overdrive Stratagem on a unit in the Movement phase, and then Onslaught on the same unit in the Psychic phase, can that unit charge?

A: No.

Q: Do you pay reinforcement points in matched play for Spore Mines brought into the game using the Sporefield Stratagem?

A: Yes.

Q: If my opponent has units that are set up after both armies have deployed, when do I use the Sporefield Stratagem – before or after those units are set up? If before, how do you determine who would place their units first?

A: You use the Stratagem before any such units are set up. If both players then have units with abilities that allow them to be set up after both armies have deployed, the players should roll off and the winner decides who sets up their units first.

Q: When using the Pheromone Trail Stratagem, can you bring the Lictor onto the battlefield in the same turn as the unit that it acts as a homing beacon for?

A: Yes – simply bring the Lictor onto the battlefield before the other unit.

*Q: If a **CHARACTER** with a damage table uses the Death Frenzy Stratagem to make a final attack before it is removed from the battlefield, which line on its damage table should you use for that attack?*

A: Treat the character as having 1 wound remaining when referring to its damage table.

Q: Do you pay reinforcement points in matched play for units brought back into the game using the Endless Swarm Stratagem?

A: Yes.

Q: Can the Opportunistic Advance Stratagem be used when a unit is affected by the Swarmlord's Hive Commander ability, the Overrun Stratagem, or the Mind Eater Warlord Trait?

A: Yes in all cases. Please note the FAQ above regarding moving multiple times in a single phase.

Q: If a unit with adrenal glands is affected by the Opportunistic Advance Stratagem, how is their movement for that phase calculated?

A: Adrenal glands don't modify either the Movement characteristic of a unit, or the dice rolled for an Advancing unit. As such, you would use Opportunistic Advance, roll the dice, double the result, add that to the Movement characteristic, and then use the adrenal glands to add 1" to the distance the unit can move.

Q: If a unit is under the effects of the Paroxysm psychic power, can the Counter-Offensive Stratagem be used on it?

A: No, because it is not 'eligible' to Fight until every other unit has done so.

Q: Do the Scythes of Tyran allow you to re-roll hit rolls of 1?

A: No.

Q: My Behemoth Hive Tyrant, armed with toxin sacs and the Reaper of Obliterax, has the Monstrous Hunger Warlord Trait. If I were to roll a 6 to wound in the Fight phase, would the final damage be (3 for the bonesword lash + 1 for toxin sacs + 1 for the Warlord Trait) × 2 for the Reaper of Obliterax's ability for a total of 10, or 3 for the bonesword lash × 2 for the Reaper of Obliterax's ability + 1 for toxin sacs + 1 for the Warlord Trait for a total of 8?

A: You multiply the weapon damage for the Reaper of Obliterax ability, and then add 2 for the combination of Monstrous Hunger and toxin sacs for a total of 8.

DESIGNERS' COMMENTARY

Since the announcement of Warhammer 40,000, some of you have been in touch with questions about the rules. Here you will find some of the most frequently asked of these questions, chosen by our group of expert and experienced playtesters, along with the answers and some guiding examples and commentary.

Q: If a rule modifies a model's Strength characteristic, and that model is equipped with a melee weapon that also has a modifier (e.g. 'x2'), could you explain the order in which the modifiers are applied to the characteristics and the weapon's Strength?

A: First you must determine the model's current Strength characteristic. To do so apply all modifiers to it that multiply or divide the value, then apply any that add or subtract to it. Having done this, you then modify this value as described by the weapon's Strength characteristic.

For example, let's imagine a model with a basic Strength characteristic of 3 is under the effects of two psychic powers: a friendly one that doubles their Strength characteristic, and an enemy one that subtracts 1 from their Strength characteristic. That model's current Strength is therefore 5. If this model then fights with a weapon like a power fist, which has a Strength characteristic of 'x2', that attack will therefore be resolved at Strength 10.

Q: Are modifiers to dice rolls cumulative in the same way that modifiers to characteristics are?

A: Yes.

For example, if a model has the benefit of cover (+1 to its saving throw) and is wounded by a plasma pistol (AP-3, so -3 to its saving throw), the total modifier to the model's saving throw will be -2.

Q: Can a dice roll ever be modified above 6?

A: Yes.

Note that in some cases, a roll will only be successful on rolls of 7+. Poxwalkers, for example, have a Save characteristic of 7+, meaning that without at least a +1 modifier to their saving throw (such as that gained from cover) they will not be able to pass the roll.

Q: Can a dice roll ever be modified to less than 1?

A: No. If, after all modifiers have been applied, a dice roll would be less than 1, count that result as a 1.

Q: If a rule or ability grants a re-roll on, for example, 'hit rolls of 1' (such as a Space Marine Captain's Rites of Battle ability) does that effect trigger before or after applying modifiers to the hit rolls?

A: Re-rolls always happen before modifiers, so the re-roll ability is triggered before applying modifiers.

For example, let's imagine a Space Marine (Ballistic Skill 3+) moves and fires a heavy bolter (a Heavy 3 weapon) whilst within range of a Space Marine Captain's Rites of Battle ability (allowing you to re-roll hit rolls of 1).

The hit dice are rolled and result in a 1, 2 and 5.

Re-rolls are applied before modifiers. In this example a single dice is re-rolled because of the Captain's ability, this time resulting in a 3.

Modifiers are applied after re-rolls. In this example there is a -1 modifier to the hit rolls for moving and firing a Heavy weapon. That means that the post-re-roll scores of 2, 3 and 5 are modified to 1, 2 and 4. Comparing the final results to the model's Ballistic Skill, only one shot hits the target.

Q: When making a hit roll with a supercharged plasma weapon, do you determine whether a '1' was rolled before or after applying re-rolls and modifiers?

A: You apply all re-rolls and modifiers first.

For example, if, after re-rolls and modifiers, the final result is then a 1 (or counts as a 1, as explained above), then the supercharged plasma weapon injures or kills the firer.

Q: If a rule states that an ability triggers on, for example, 'hit rolls of 6+', does this refer to the result of the dice rolls before or after modifiers are applied?

A: It refers to the final result, after re-rolls and modifiers (if any) have been applied.

The only exception to this would be abilities that specifically state, for example, 'unmodified hit rolls of 6', or 'hit rolls of 6 before modifiers are applied.'

Q: Can I use the Command Re-roll Stratagem to re-roll a dice roll made by my opponent?A: No.

Note that the rules assume that a player always rolls their own dice (instead of asking their opponent, for example, to roll hit rolls, saving throws, etc. on their behalf). That being the case, you can only use the above-mentioned Stratagem to affect dice rolls you make, and not those made by your opponent.

Q: What happens if a unit that has become split up during battle cannot re-establish unit coherency the next time it moves?

A: In this case the unit cannot move.

Note that the rules concerning unit coherency apply any time that a unit is moved, including charging, piling in, consolidating, etc. Again, if a unit cannot end such a move in unit coherency, it cannot make the move.

Q: Can CHARACTERS only perform a Heroic Intervention against enemy units that charged this turn, or can they do so against any enemy unit?

A: They can do so against any enemy unit.

Note that they can only do so if they end up closer to the nearest enemy model, whether it charged this turn or not.

Q: Some CHARACTER units can include non-CHARACTER models – the Genestealer Cults Patriarch and its Familiar 'upgrade', for example. Can such a unit be shot at even if it isn't the closest visible enemy unit?

A: No. The restrictions on targeting CHARACTERS applies to a unit whilst any model in the unit has the CHARACTER keyword (and none have 10 or more wounds).

For example, if a Patriarch takes a Familiar as an upgrade, the Patriarch is a CHARACTER, but the Familiar is not. Neither has 10 or more Wounds. Enemies can therefore only target the pair if they are the closest visible enemy models. If the Patriarch is slain and the Familiar is not, enemy units could then target the Familiar freely.

Q: If a model cannot shoot at the closest visible enemy unit for some reason (e.g. it is within 1" of one of your units) but the next closest visible enemy unit is a CHARACTER, can that model then target the character?

A: No.

Q: When rolling for abilities such as 'Disgustingly Resilient' or 'Tenacious Survivor' against attacks which inflict multiple wounds, do you roll to ignore each individual wound inflicted by the attack, or do you roll only once to ignore all the wounds inflicted by the attack?

A: Roll to avoid each wound lost separately.

For example, if a model with Disgustingly Resilient fails its saving throw against an attack made by a thunder hammer (Damage 3), you would roll three dice and for each result of 5+ you would ignore a single wound.

Q: When determining whether a model benefits from cover, does the model's entire unit need to be fully on or within terrain, or just the model making a particular saving throw?

A: All of the models in a unit need to be at least partially on or within terrain if any of the models are to receive the +1 bonus to their saving throw.

Note, however, that it is possible for a unit to gain the benefit of cover as it suffers casualties during the Shooting phase by removing those models that are not on, or within terrain. As soon as the last model that was not on or within terrain is slain, the rest of the unit immediately starts to receive the benefit of cover.

Q: What happens when a model fires a weapon that can shoot at targets that are not visible to it (such as a mortar) at a target it cannot see, if the target unit is within range of a piece of terrain that grants it the benefits of cover only when it is obscured by a certain amount from the point of view of the firer (such as a unit within 3" of Imperial Statuary)?

A: The unit receives the benefit of cover.

Q: Is a unit's charge roll the same thing as its charge distance?

A: Yes.

Q: Can you declare charges against units that are not visible to the charging unit?

A: Yes.

Note however that the unit being charged still obeys the normal rules for targeting when it fires Overwatch, and so, if a model cannot see the charging unit, it will not be able to fire Overwatch.

Q: If any of your units are eligible to fight in the Fight phase, can you choose for them not to fight this turn? Also, if any of your units charged in the Charge phase, do they have to fight first in the Fight phase, or can you choose for them to wait until later in the phase?

A: All eligible units must fight in the Fight phase; they cannot 'pass' and wait for another phase. Additionally, a unit must fight when it is its time to do so; it cannot 'hold' in order to fight later in the phase. So if a unit charged in the preceding Charge phase, it must fight before any

non-charging models in the Fight phase (barring any related abilities).

Note that when a model fights, it must do all of its close combat attacks if it can do so – you cannot choose for it not to do so (though you can still choose which weapon it uses for each close combat attack).

Q: If a unit starts the Fight phase within 1" of an enemy unit but, due to casualties suffered and models removed, it is no longer within 1" of any enemy units later in the phase, can it still be chosen to fight?

A: No, unless the unit in question charged this turn it cannot be chosen to fight if there are no longer enemy units within 1". Note that it is possible – if heavy enough casualties have been incurred – that even a unit that did charge may not be close enough, even after a pile-in move, to make close combat attacks. It can still, of course, consolidate.

Q: If a unit starts the Fight phase with no enemy units within 1", but then enemy units that have been chosen to fight move to within 1" of it as a result of their pile-in or consolidation moves, can that unit then be chosen to fight when it is your turn to choose a unit?

A: Yes.

Note, however, that units can only be chosen to fight once per phase.

Q: When piling in and consolidating, does a model have to move as close as possible towards the nearest enemy model, or do they just need to move closer to it?

A: If a model moves at all when piling in or consolidating, it only has to end its move closer to the nearest enemy model than where it started. It is not necessary to move as close as possible (i.e. base-to-base contact).

Note that if a model is in base-to-base contact, it cannot possibly end a move closer to the enemy, and so cannot move when its unit piles in or consolidates.

Q: If a unit piles in or consolidates into a unit it didn't declare a charge against in the preceding Charge phase, does that unit get to fire Overwatch?

A: No.

Remember though that units that charged can only make close combat attacks against units that they declared the charge against, even if pile-in moves, etc. bring them within 1" of a different unit.

Q: When is a unit considered to be 'completely destroyed' or 'wiped out'?

A: These two terms are used synonymously. A unit is considered to be completely destroyed when the last model in that unit is destroyed (also referred to as slain) or flees.

Q: Which player rolls the D6 to see if a vehicle explodes, or if a monster has death throes, etc. when it is destroyed?

A: The player whose model has been destroyed rolls the D6.

Q: In missions where players alternate deploying units, do units that are set up somewhere other than the battlefield still count as a player's deployment choice? What about units that begin the battle embarked within a transport?

A: Units with abilities on their datasheets that allow them to be set up somewhere other than the battlefield must still be 'set up' in that locale, and so still count as a deployment choice. When you choose to set up a transport, declare what units (if any) are embarked inside – these are not separate deployment choices.

For example, two players are deploying their armies for the Only War mission. The mission instructs them to alternate deploying their units. Player A starts by setting up a unit of Ork Boyz on the battlefield. Player B then sets up a unit of Intercessors on the battlefield. Player A then sets up a Battlewagon on the battlefield – as it is a transport, Player A declares it will start the battle with a Warboss and a unit of Tankbustas embarked inside. Player B then sets up a unit of Terminators, but uses their Teleport Strike

ability to set them up in a teleportarium chamber instead of on the battlefield. Player A then sets up their next unit, and so on.

Q: Can a Battle-forged army ever have fewer than 0 Command Points?

A: No.

Regardless of how many Auxiliary Support Detachments you take, you can never start a battle with fewer than 0 Command Points.

Q: What is the difference between a unit's Power Rating and its points value? Can I play a matched play game using my army's Power Level instead of its points total? Can I play a narrative play mission using a points total?

A: A unit's Power Rating is a measure of its efficacy on the battlefield. The higher the Power Rating, the more powerful the unit. An army's Power Level is calculated by adding up the Power Ratings of all the units in the army, so an army with a high Power Level is more powerful than one with a low Power Level.

Power Ratings are designed to give players, at a glance, an idea of how mighty a unit is on the battlefield, irrespective of the weapons and wargear it can take (they are actually based on a calculation of the unit's average value, after considering all possible combinations of weapons and wargear the unit can have). They can therefore be used as a quick guide to establish the comparative might of each army, and are intended primarily for open and narrative play games.

Points values are similar, but are designed specifically with matched play in mind because they offer more granularity.

Whilst it takes a little longer to work out each unit's points value, doing so enables you to differentiate between two similar squads equipped with different weapon options, as the points values listed in our books reflect the fact that some weapons are more powerful than others. There is a relationship between the two – a unit with a high Power Rating will also have a

high points value. As a result, it is perfectly legitimate to play a matched play game using Power Ratings instead of points values. Likewise, if you wish to use points values in a narrative or open play game, you can. We recommend both players use the same method as each other, but as long as you both agree, you can decide which method you prefer to use.

Q: If I can choose a keyword for a unit, such as <REGIMENT> for Astra Militarum, could I choose that keyword to be, for example 'BLOOD ANGELS' or 'DEATH GUARD'?

A: No.

In the example above, 'Blood Angels' is a Chapter of the Adeptus Astartes and 'Death Guard' is a Legion of the Heretic Astartes – neither of which are Regiments of the Astra Militarum.

Q: If I create an Astra Militarum Regiment of my own and name them, for example, the 'Emperor's Finest', and I then also create an Adeptus Astartes Chapter of my own choosing, and also call them the 'Emperor's Finest', do the abilities that work on the <REGIMENT> and/or <CHAPTER> keywords now work on both the Astra Militarum and Adeptus Astartes units?

A: No.

The intent of naming Regiments, Chapters, etc. of your own creation is to personalise your collections and not to enable players to circumvent the restrictions on what abilities affect what units. It is also not intended to circumvent the restrictions on which units are able to be included in the same Detachment.

Q: When a model does not have a base, as is the case with many vehicles, what exactly is the 'hull' of the model?

A: The hull of these models refers to the main body of the model. It does not include things such as turrets, sponsons, aerials, banners, spikes etc. If there is still doubt, we recommend both players agree about what constitutes the hull of such models before the battle begins.

Q: What is the difference between a keyword and a Faction keyword?

A: The only real difference is that Faction keywords are used when building an army; when Battle-forging an army, for instance, you will often only be able to include units in the same detachment if they share the same Faction keyword. Also, if you are playing a matched play game, you will need to have an Army Faction – this is a Faction keyword that is shared by all of the units in your entire army (with the exception of those that are Unaligned). Once the battle has begun, there is no functional difference between a keyword and a Faction keyword.

For example, when creating a Battle-forged army for matched play, I take two Patrol Detachments; the first contains only units with the HERETIC ASTARTES Faction keyword, and the second contains only units with the DAEMON Faction keyword. My Army Faction is 'CHAOS' because this is a Faction keyword every unit in the entire army shares.

Once the battle has begun, the distinction between keywords and Faction keywords no longer has any effect – both are used to interact with abilities identically. Imagine, then, that the HERETIC ASTARTES Detachment contains a unit of Possessed (which does not have the DAEMON Faction keyword, but does have the DAEMON keyword), and I choose for them to replace their <MARK OF CHAOS> keyword with KHORNE. If the DAEMON Detachment contained a Herald of Khorne, his ability to 'add 1 to the Strength characteristic of all KHORNE DAEMONS' would also apply to the unit of Possessed, as they have both the KHORNE and DAEMON keywords.

Q: Several missions refer to different types of victory – minor victory, major victory, heroic victory, etc. Do the different types of victory mean anything?

A: Only for determining bragging rights post-battle.

WHAT DATASHEET RULES SHOULD I USE?

Use the following flowchart to determine which datasheet to use for your models. Note that regardless of which datasheet you use, if you are playing a matched play game, or a game that uses a points limit, you should always use the most recently published points for your models and their weapons and wargear.

For example, if you wished to use a Commissar with a power axe, you would check if the codex – *Codex: Astra Militarum* – has a datasheet for Commissars. It does, so you would use this datasheet – however, it does not support the wargear options which allow him to replace his power sword with a power axe, so you would use the Commissar wargear options from *Index: Imperium 2*.

Similarly, as *Codex: Astra Militarum* does not have a weapon profile for the power axe, you would use the one found in *Index: Imperium 2*.

When coming to calculate the points cost, the Commissar himself and the bolt pistol have points in *Codex: Astra Militarum*, so you would use those alongside the cost for the power axe from *Index: Imperium 2*.

Alternatively, if you wished to field an Autarch model with a banshee mask, you would use the Autarch datasheet from *Codex: Craftworlds* alongside the appropriate wargear option from *Index: Xenos 1*.

Codex: Craftworlds contains rules and points costs for all your Autarch's wargear, so you would use these in place of the ones from *Index: Xenos 1*.
