

ETC 2019 Novi Sad, Serbia

WH40K 8th edition FAQ and Clarifications Version: FINAL DRAFT

Document History:

Welcome to the ETC FAQ and Clarifications document to be used at the ETC 2019 in Novi Sad.

Disclaimer

The ETC FAQ does not have the purpose to particularly offer the -right- or -commonly accepted- solution to a grey area in the rules. Its purpose is to offer a compendium of grey zones in the rules that specifically are ruled one way or the other in order to avoid frustrations and heated arguments at the gaming tables come the ETC. If you want to use this document at one of your tournaments or as the base of your own proper, even maybe adjusted FAQ, that's fine, but at least reference you are using our document as a base or to complete your own compendium in your document, thanks!

Updates:

2018/08/07: Version 1, post-ETC issues clarifications and clarifications following Big FAQ2

2019/01/26: Version 2, post Chapter Approved and Vigilus updates

2019/03/09: Version 3

2019/04/05: Version 4

2019/05/11: Version 5, POST big FAQ changes

2019/06/10: Version 6

2019/07/1: Version 7, final draft before ETC

Let us know if there is stuff missing please by hitting us up on facebook, putting it on the captains section of the Warhammer Forum or by getting in touch via mail (tomadriany@gmail.com).

GENERAL ETC CLARIFICATIONS

1. Players are required to give full disclosure of their army list to their opponents, including weapons, wargear, special rules and the contents of any transport vehicles.
2. Rules issues troubleshooting guidelines: ETC Clarifications > English GW Official FAQs > English Codex/Index > English Main Rulebook. Any document published by Games Workshop after list submission date will not be used at ETC. With digital releases, be aware that not all versions (Kindle, Android) will be updated regularly and might create discrepancies in the rules. In these cases, the printed physical copy takes precedence unless an FAQ entry was generated for that particular update.
3. Models are expected to be WYSIWYG (What you see is what you get). There will be a margin of tolerance for non-weapon wargear but always approve any deviations through the captain's council prior to the start of the tournament **or be subject to possible penalties/have your models removed at the ETC. The referee crew is going to be a lot more strict come 2019 about the modeling policy. Simon Weakley be warned...**
4. Players may only convert their models for aesthetic purposes. Any players/teams that according to the opinion of the Referees have converted their models specifically to gain a gameplay advantage may be penalized. This includes the repositioning of weapons to have extended LOS. Always assume stock position and height of models to determine if modeling for advantage is in play.
5. In case of ruling required where the size of the model must be taken into account, the size and dimensions of the latest range of citadel warhammer 40000 miniatures models must be used. Players using converted, old or alternative models are expected to be able to provide the model from the latest range upon request by the Referee.
6. Where discrepancies occur between datasheet entries and summaries at the back of a book always use the datasheet entry as the final and correct entry.
7. **Players using drop pods must use them with the petals closed at the ETC.** True LOS then applies.
8. For the purpose of the rule of 3, Captains, Watch Captains, Masters, Wolf Lords, and basically all other dataslates that fulfill that same role across codexes, are subject to the rule of 3 as long as they have the same statline, even if they have different abilities listed. Special characters are exempt from this rule.

CORE RULES

GENERAL

1. Fast dice rolling is mandatory when it will not impact the game. When all the attacks in a certain volley have the same characteristics, make all the hit rolls at the same time, then all of the wound rolls. Apply random damage rolls 1 by 1. This to ensure players do not stick to rolling attacks 1 by 1 when it is not absolutely necessary. You are still allowed to use a CP reroll to roll one of the dice in the fast rolling procedure if you would be so inclined. In cases where this might be important, the dice need to be rolled one by one, as would be the case for models inside and out of cover where a unit might benefit from +1 save due to cover when the models outside of cover would be slain first. This implies the modifier for being in cover is checked for and applied when saves are being made.
2. Where abilities take place on a certain 'roll' value, check if it triggers on a given value (generally has a + sign), in which case the value is checked for after all modifiers are applied.
3. If, after all modifiers have been applied, a dice roll would be less than 1, count that result as a 1.

4. If a model's to hit would be modified to require more than 6+, the attack automatically fails.
5. Abilities with the same name do not stack to the same unit. For instance, multiple drone controllers do not infer more than +1 to hit for units in range of more than one drone controller, nor do units in range of more than one model with the Technomancer rule benefit from more than a +1 to Reanimation protocols. Same applies for a Darkshroud's Icon of Caliban rule for instance.
6. Abilities that allow you to ignore wounds suffered by a model such as Eldar Fortune, Tenacious Survivor trait, or Nurgles Disgustingly Resilient, can be used against mortal wounds. When units that have these abilities suffer multiple damage from one source, roll a die for each of the wounds inflicted by the multiple damage roll unless one of the abilities used states otherwise.
7. Abilities that improve a save, like a Rubric Marine's All Is Dust ability, or the Space Wolves Mantle of the Troll King ability, do add +1 to saving throws made with invulnerable saves (unless otherwise stated), but bear in mind that restrictions to that condition may apply (such as All Is Dust only applying when the damage profile is 1).
8. Models with abilities that affect all models or units within a given range are always considered to be in range of the aura themselves and can thus benefit from the effect. This is the case for Wolf Priests, Apothecaries,... and the like.
9. Damage from multi-wound attacks vs multi-wound models that are members of a unit must be resolved one at a time.
10. When a unit of the 'transport' type dies, roll a D6 for each model of each unit in the transport that must disembark, but remember you can freely choose which model(s) to allocate the wounds to. Remember that when a transport explodes, the models that have to disembark are not eligible as a target of the exploding vehicle as this step occurs prior to the disembarkation.
11. When you have an ability to reroll certain actions that are done on 2D6, 3D6 or the like, like in the case of rerolling charge range, roll ALL the dice again. Similarly, when a reroll calls out the roll of a single die (like is the case for using a CP reroll), only one die can ever be rerolled this way. It would be ok to reroll one of the dice from the 2D6 charge range with a CP reroll for instance.
12. Abilities that return dead models back to play within an existing unit such as Necron's Reanimation Protocols, a Space Marine's Narthecium, the Tervigon's ability to replace Termagants in an existing unit, or similar effects that add models to units, do not require any reinforcement points.
13. When multiple targets are equidistant for rules and abilities that call out the nearest model/unit, the player whose rule comes into effect for the distance can choose which unit is affected from the eligible targets. **The only exception to this is when flyers are put on (a level of) a terrain piece and would be targeting a character surrounded by another unit. Models with the Flyers battlefield role shall not be (ab)used to circumvent targeting restrictions.**
14. When a weapon/ability references a model's 'Wounds characteristic' such as with an Ork tellyporta mega-blast or the Red Terrors Swallow Whole ability, take into account the wound characteristic on its profile, and not its current wounds value.
15. Models having to disembark from a surrounded vehicle can be placed as long as they can end up in a legal place and more than 1 inch away from any enemy models.
16. Units that are deployed as a single "drop" but are then treated as separate units from that point onwards, are not considered separate units until the game begins e.g. for the purposes of having 50% in reserve vs on the table. For instance, setting up a unit of three Wyverns that then count as 3 separate units afterwards, will count as 1 unit towards the 50% rule for tactical reserves.
17. When an ability or stratagem allows you to 'add' a model to the unit, you can never set up a model within 1 inch of enemy models unless **the ability or stratagem states otherwise.**

18. Abilities or stratagems that allow you replace destroyed units with identical units, or that allow you to place new units on the battlefield always cost reinforcement points (Send In the Next Wave, Endless Swarm,...). When you simply add or replace models in a unit, there is no need to set aside reinforcement points (The Dead Walk Again is an exception to this and you need to set aside reinforcement points for taking the model count beyond starting strength numbers).
19. When rules for stratagems and abilities clash in regards to timing, like was the case for Sporefield and Find The Best Spot, players roll-off to see which takes precedence. See the Deployment Clarification section for when one or more of these clashes would occur.
20. Where abilities, rules, or stratagems interact when a model is slain, use the profile as if the model had one wound remaining in case of models with a degrading profile.
21. Where abilities, relics or warlord traits let you generate command points, bear in mind that your model with the ability, item or WL trait must be deployed on the table for it to be used (Helm of the third eye, Kurov's Aquila,...).
22. When you use a Stratagem, ability, relic or psychic power to remove a unit from the battlefield and set it up again, **and the unit model count gets altered (Unstoppable green tide, Tide of Traitors,...)**, any persistent effects (such as aura buffs that are not inherent to the unit, psychic powers that had been cast upon it or one of its models, except where it concerns wounds that have been suffered) are lost. **For any other units making use of similar abilities, buffs, debuffs and other persistent effects remain on the unit.**
23. Models entering play via relics, abilities or stratagems, like is the case for 'Cloudstrike' for instance, always do so counting as moved their maximum distance.
24. **Units that enter the game through conjuration or summoning, whether through means of psychic powers, stratagems, or abilities like Daemonic ritual, can enter the game turn 1 and never count towards the rule of 3.**
25. **Any unit that is removed from the board and subsequently set back up may not move for any other reasons than to make a charge, pile in, consolidate move, and/or perform a heroic intervention.**
26. **Abilities that trigger when a model is slain, like the Graia Dogma 'Refusal To Yield', or 'Our Kin Shall Rise Again' from a Frozen Stars Warlord Trait cannot be used in conjunction with any other ability that ignores wounds. In such cases players can choose which ability takes precedence.**
27. Following beta rules and amendments are in play at the ETC:
 - Army Faction (Rulebook p. 214)
 - Point Limit & Reinforcement points (Rulebook p. 214)
 - Strategic Discipline (Rulebook p. 215)
 - Battle-Forged armies (Rulebook p. 240-245)
 - Limits of Command (Chapter Approved 2017 p. 67)
 - Boots on the Ground (Chapter Approved 2017 p. 67)
 - Psychic Focus (Big FAQ Two 2018 p. 1)
 - Targeting Characters (Big FAQ Two 2018 p. 1)
 - Battle Brothers (Big FAQ Two 2018 p. 1)
 - Tactical Reserves (Big FAQ Two 2018 p. 2)
 - Prepared Positions (Big FAQ Two 2018 p. 4)
 - Tactical Restraint (Big FAQ Two 2018 p. 4)
 - **Bolter Discipline (Big FAQ 3)**

Take note that if certain rules are not present in the most recent big FAQ document, they still apply. An example of this is Psychic focus. New Big FAQ entries will always update entries from previous big FAQ's but they will not invalidate any of the other entries that appeared previously.

MOVEMENT PHASE

1. Units can only embark in the movement phase or with an action that specifically allows them to do so outside of the movement phase.
2. If a unit is unable to re-establish coherency with its move, it cannot move. Note that the rules concerning unit coherency apply any time that a unit is moved, including charging, piling-in, consolidating, etc. Again, if a unit cannot end such a move in unit coherency, it cannot make the move.
3. If a flyer type unit cannot complete any kind of legal move, it is destroyed at its original starting position for explosion purposes and other special rules.
4. When transports start their movement phase within 1 inch of enemy models, embarked passengers can freely disembark, following all the normal rules to do so, before the transport falls back and as such disembarking models are not subject to any of the fallback restrictions.
5. A flyer can pivot even if it is completely surrounded by enemy models.
6. You cannot surround your own transports with models and then disembark a model so it is auto-slain.
7. For the purposes of determining whether a Flyer has moved over a certain unit, count it as doing so if any part of the flyers base has moved over said unit.
8. Units with models that are unable to move, like units with models within 1 inch of enemy units that are blocked from moving, or units that do not have coherency, cannot embark onto a transport.
9. Abilities that trigger in the movement phase when units 'move over' other units, like Void Mines from Razorwings or Stasis Bombs from Dark Talons, can be used on a unit with models currently within 1" of an enemy unit.
10. When placing models and using wobbly model syndrome, the controlling player is free to place their model how they wish as long as there are no abstractions regarding the law of physics when they are placed (like placing a shadowsword on its side or other such silliness), regardless of the possibility for a model to balance or stand in place, but following the constraints below:
 - A: The center point of the model's base must be declared over a terrain piece at the level it wishes to stand (models cannot be suspended in mid air or halfway up a wall),
 - B: Models cannot be declared to be placed on top of other models at the same level, following the same restrictions for "overlapping" as models on the table level
 - C: To measure distances, hold the model's base with the center where you said, and then measure
 - D: If it's a model where you don't measure to the base but to the hull, the direction/orientation of the model must also be specified at the same time. If this isn't done, the opposing player is free to specify any direction they like the first time ranges are measured.

In all instances where wobbly model would come into play the motto is: be reasonable, talk to your opponent, and try not to game the system. The referees will be harsh and hand out yellow cards for unsportsmanlike conduct to anyone trying to abuse this rule for a gameplay advantage. Players are encouraged to immediately seek referee assistance if they feel their opponent is pushing the limits in regards to Wobbly Model Syndrome.

PSYCHIC PHASE, PSYKERS AND SPELLS

1. Smite can be used on units within 1" of friendly units.
2. Where models or units have abilities that allow them to deny a psychic power, as is the case for Necron Gloom Prism or Khorne Flesh Hounds for example, the deny the witch attempt is subject to the 24" range limitation unless the ability states another range.
3. Psychic Powers cannot be cast when a unit with Psychic Abomination would be the target of a psychic power that works on the nearest unit. Do note that powers that do not directly affect the unit with Psychic Abomination, still take effect. This happens for instance when a unit that is the target of a charge or shooting attack from a unit with the psychic abomination rule would have altered characteristics, improved save, add modifiers to their rolls, and/or cause them to re-roll dice or any other such effect.
4. Psychic Powers with the same name that are scattered across several books/releases and might even work on different keywords count as the same spell and cannot be cast more than once. This is the case for instance with Miasma of Pestilence from the Deathguard and Chaos Space Marines releases respectively.
5. When Vortex Of Doom would affect multiple units, roll a separate D3 for each affected unit.
6. A power is manifested when the target number is met, regardless if the power is cancelled by a stratagem or denied by a DTW roll, or a legal target can be found to resolve the power once manifested.

SHOOTING PHASE

1. Unless otherwise stated, Supercharged Plasma Guns that roll a 1 will kill a vehicle outright.
2. Remember that the restriction on when you can fire at a character is checked on a model by model basis in the firing unit. Also remember the restriction on targeting characters is based on the wound characteristic on its profile and not its current wounds.
3. Remember that weapons that do not use or need LOS can target characters as long as they are the closest unit. Units targeted by units that do not need LOS, that are currently in terrain and out of LOS, will still benefit from cover if they fit all criteria to obtain cover.
4. To determine LOS from a model and whether an enemy is obscured or not, consider every part of both models. A models base never comes into play when checking LOS, and is just used for range. Bear in mind that for models without a base, you check LOS to the model (this includes sponsons and turrets and the like), range from the weapon (this includes sponsons and turrets and the like) onto the hull (disregarding sponsons, turrets and the like).
5. When a unit can fire twice, work out both shooting attacks immediately one after another before moving on to another unit, unless the power or ability states otherwise. The second attack can target another unit freely, unless stated otherwise.
6. When only characters with less than 10 wounds remain in an army, they can be freely targeted, including by weapons that do not need LOS.
7. If a character couldn't normally be selected as a target for being the nearest model (by being surrounded by another or more than one non-character units), this cannot be circumvented by being on a higher level even if technically all models would be equidistant to the character from the perspective of the shooting model/unit. This goes for

models with the flyer battlefield role that land on top of a given unit by being placed on terrain for instance.

ASSAULT PHASE

1. The player performing Overwatch actions decides in which order units shoot.
2. Units that have a rule or ability to charge more than 2D6" such as the Brass Scorpion's 3D6" charge, or effects that grant +1 to charge moves or the like, are still only allowed to declare charges if they are within 12" from the enemy.
3. Remember that a unit that charged can only fight the units it charged in the same turn. If you pile into another unit, you still cannot attack it until the next turn. This is important for units like Berserkers for instance. Even if they fight twice they still cannot allocate attacks to units they haven't charged.
4. Heroic Intervention only applies in your opponents charge phase regardless if your opponent declared a charge or not. A charging unit may not allocate attacks to a unit that joined combat by means of Heroic Intervention unless if the character was also a target of the initial charge. A character already within 1 inch of an enemy unit cannot perform a Heroic Intervention. Heroic intervention does not apply vs units with the flyer battlefield role unless the unit performing the intervention also has the Fly keyword.
- ~~5. A unit cannot consolidate to be within 1 inch of an enemy flyer if it doesn't have the fly keyword unless the flyer is in hover mode.~~
6. Units completely out of LOS cannot be affected by overwatch fire unless the weapon allows for shooting at units out of LOS.
7. If a character charges into a unit, it can be the subject of overwatch fire even though it is not the closest visible enemy unit.
8. A unit that would no longer be in coherency due to overwatch or such can still opt to charge if the charge move will allow it to restore coherency. Similarly, if a unit finds itself out of coherency in the fight phase, models in that unit are still allowed to make any Pile In and/or Consolidation moves as long as they can restore coherency. If this is impossible, no model in the unit can move at all
8. When two units are equidistant, the player controlling a unit can freely choose which unit to pile in towards.
9. For interactions like determining the range and engagement for assaults that involve vehicles, including those with the hover rule, consider the hull to be the downward projection of its hull-features (disregarding sponsons, spikes, antennas, turrets, and so on) onto the floor (current level in case of vehicles with fly). In the case of interactions with other models, including other vehicle models, these can fit where they can fit (like underneath tank tracks), even if this would mean that would end up inside or on the downward projection of the hull. This does not automatically lock the vehicles in combat, they can still move away from said models if they are able to move when considering all other factors.
10. Remember that models within range of enemy units HAVE to strike when it is their turn to do so.
11. When units attempting to charge an enemy unit that is up on terrain are unable to do so because there is no space to fit them, wobbly model applies and the charge is counted as successful. Before moving any models, work out which and how many models would be eligible to strike and place them as close to their intended position as possible.
12. A unit cannot fall back from combat by moving up or down a wall or floor unless it has the Fly keyword.

13. When units with the flyer battlefield role pile in, they may freely pivot and change their facing as part of doing so.
14. Units making a heroic intervention must engage units whenever they are able to do so.

MORALE

1. Models fleeing as a result of a failed morale test cannot be brought back into the game by means of Reanimation Protocols, an Apothecary's Narthecium, or any similar abilities.

STRATAGEMS

1. Stratagems like 'Indomitable Guardians' and 'Counter-Offensive', that interrupt the alternating flow of the fight phase, cannot be used in conjunction with each other to make units in your army fight one after the other. Stratagems like these never 'stack'.
2. Stratagems with the same name that are scattered across several books (like Veterans Of The Long War or Orbital Bombardment just to name a few but not the case for Webway Assault, Webway Strike and Webway Portal, which have a different name) are still considered the same stratagem even when they target different keywords, meaning only one instance of these stratagems may be played per phase/battle as the stratagem describes.
3. Stratagems that allow you to buy extra relics can be used even if you didn't or couldn't choose to take a relic in your army in the first place.
4. Stratagems will indicate when they can be used. Unless specified otherwise, they may not be used before the battle begins. As such, a command re-roll cannot be used before the battle for any sort of roll-offs, including seize the initiative. You cannot use your command re-roll stratagem to reroll opponents dice or reroll the dice to determine when the game ends.
5. Unless they state otherwise, stratagems that do not list they target friendly or enemy models or units, can only be used on models or units from your own army. For example, in mirrormatches you are prohibited from using Tide Of Traitors on your opponents unit to remove it from the table, or using Linebreaker Bombardment on your opponents Vindicators, or any other interaction of the sort.
6. Stratagems used at the start or end of the battle round do not count as happening within a phase. Anything happening at the start or end of a turn counts as happening within a phase and is hence affected by not using a stratagem more than once per phase.
7. Rules, abilities, and weapons that ignore cover will also ignore the benefits of the Prepared Positions Stratagem and other abilities or situations where a unit benefits from cover.
8. Units that were embarked when Prepared Positions was activated but subsequently have to disembark will benefit from the stratagem during the first turn if all other requirements are met.
9. The Linebreaker Stratagem used by the different Space Marine chapters cannot be used if any of the Vindicators cannot shoot whether this is from being within 1" of enemy units, falling back or advancing or any other such condition that would apply.
10. The counter-offensive stratagem changes the strike order and as such can negate abilities, relics, warlord traits or powers that state a unit must strike last, as is the case for the Armour Of Russ, The Vexator Mask, Paroxysm, The Shattering Truth WLT or any other such interactions.

TERRAIN AT THE ETC

GENERAL TERRAIN CLARIFICATIONS

1. When Units attempting to charge an enemy unit that is up on terrain are unable to do so because there is no space to place them within 1" of the enemy models, wobbly model applies. After resolving overwatch, calculate the necessary distance for the closest charging model to travel in order to complete a charge, assuming it could be placed on the same level. If the charge distance is at least this much, the charge is considered successful and the units are considered to be engaged. Note that this only ever happens if your unit would be legally allowed to be placed there in the first place. Only models that should have been able to be placed within 1" of enemy models because of the charge roll can be elected to fight said unit this turn. Do not account for pile in moves. It helps to not actually move any models in the charge phase in this case and proceed to place models where they should be when the results have been determined and casualties have been removed.
2. Note that only models within 1" can fight with enemy models. This basically means you can only ever attack models on the same level if there is more than 1" distance between multi-level terrain.
3. To determine whether a non-infantry model is 50% obscured in order to gain the benefit of cover, you only receive the benefit of cover if at least 50% of every model is obscured from the point of view of the shooting model. Shooting is performed on a per model basis, for ease of game play players should group firing models into ones that provide the target unit cover, and ones that do not, prior to firing (similar to firing different weapons) then roll in two batches.

Example: A Rhino is touching, in or on a terrain feature classified as woods, and has a squad of terminators between it and the unit firing at it, obscuring 50% or more of the rhino. The rhino would benefit from cover. However, if three models in the firing unit can see the rhino without 50% obscurement, the shots from those three models would be rolled separately, and the rhino would not benefit from cover when making saves against them. Note that at the ETC, touching a terrain feature like a wall is enough for vehicles to be claimed as in or on terrain, due to the abstract nature and the quality of terrain we see at ETC events.

FORTIFICATIONS

1. A unit that starts its move within 1" of a fortification part of the opposing army is not subject to the rules regarding Falling Back if there are no other enemy units embarked upon it or within 1".
2. Enemy models, just like friendly models, are allowed to move onto fortifications bought as part of the opposing army as long as it doesn't have a transport capacity.

MISSIONS, ARMY AND DEPLOYMENT CLARIFICATIONS

MISSION CLARIFICATIONS

1. When you draw the 'Priority Orders Received (66)' tactical objective, and draw an objective that requires multiple units to complete, such as 'Hold the Line (43)', or an objective that isn't completed using your own units, such as 'Psychological Warfare (55)' or 'Area Denial (54)', immediately redraw another card, put the drawn objective card back in your deck and immediately let your opponent reshuffle remaining cards. In 'Spoils of War', when the additional card from 'Priority Orders Received (66)' is in the 11-26 range, your opponent can still score that card, in which case the bonus points are lost.
2. Note that some objectives can be achieved on the opponents turn. This is the case for instance for psychological warfare and for defend objective X type cards.
3. Note that unless specified otherwise, Tactical objective cards always start counting from the moment you draw them and cannot be scored retro-actively.
4. Note that when placing objectives, they are always dropped in the same order. Place objective 1 first, followed by objective 2, ...
5. Objectives can only be placed on the ground floor of the battlefield.
6. When a tactical objective cannot possibly be achieved, it may be immediately discarded and another card may be drawn. As an example this would be the case if the opponents army would entirely consist out of one or 2-man units with leadership 8 for instance when you draw psychological warfare. Since it cannot be achieved at any point in the game from the point the card is drawn you may discard and redraw. It is not the case for instance when you draw objective X and objective X is currently out of movement reach of any of your units even if the game would currently be on turn 7. The discarding is only ever a consequence of interactions with a specific army make-up at a given point in time and not of players choices during a game.
7. Codex specific Tactical Objectives cannot be used at the ETC. Use the general deck instead.
8. Limits of Command is in effect: You cannot use the re-rolls like the Command Re-roll Stratagem to affect Mission dice rolls. Mission dice rolls include any dice rolls that are made before the battle begins (such as those that determine who chooses deployment zones or who gets the first turn), those that must be made at the end of a battle round (such as rolls that determine if the battle ends) or any rolls that determine how many victory points are awarded to a player.
- ~~9. In a mission where Vanguard Strike or Search and Destroy deployment is in effect, the player choosing table sides also chooses which way the line is drawn to divide the table in.~~
10. When an objective secured type ability is in play when several units are on an objective, count the number of objective secured models to determine who controls an objective. Use non-objective secured models as a tie-breaker only in such cases where there are at least one obsec unit from both players controlling an objective.
11. Witchhunter can be scored when a psyker, or a unit with a psyker model or the psyker keyword, is destroyed.

ARMY

1. Your army WARLORD cannot be a unit that does not count for VP conditions, like Tyranid spores, nor can it be a unit that cannot be targeted like a Feculent Gnarlmau.
2. When supplying your armylist, it is mandatory to list which warlord trait and psychic powers your models will have. You MAY OPT to change warlord trait or psychic powers prior to any battle, but if you forget to discuss with your opponent pregame, you will default to what is listed on your list during the game. This way there can be no surprises during a game.
3. It is ETC tournament etiquette to state how many command points you have in your army when: running through each other's army list, when using or gaining command points during the game, ... Clearly state "I have XXX Command Points left now" whenever a CP use or gain happens in the game.

DEPLOYMENT CLARIFICATIONS

1. Models need to deploy fully within their deployment zone unless an ability states otherwise.
2. When one deploys units onto the battlefield, whether this occurs at the beginning of the game or during the game when reinforcements arrive, remember you cannot place units in a position they wouldn't normally be able to move into. As an example, you cannot deploy a non-flying vehicle on the top level of a ruin.
3. Units that can deploy via special abilities like a Nurglings Mischief Makers or the Eldar Stratagem Phantasm, or a Spawn that is generated via an ability or spell, still cannot place any models within an inch of enemy models.
If both players have units that can be set up after both armies have deployed, or before the start of the first battleround, proceed to roll-off to decide who starts placing their units with that specific ability first, after which players alternate putting down units.

SHADOWSPEAR

VANGUARD MARINES CLARIFICATIONS

1. The Crusader Helm only works for aura abilities that are listed as being 'within X inches of this model' (eg it does not work in conjunction with an omni-scrambler).

DAEMONKIN

1. The units listed in the Demonkin Codex cannot be drafted from the Thousand Sons or Death Guard Legions, or have the Fallen keyword.

VIGILUS ABLAZE CLARIFICATIONS

GENERAL

1. When checking which unit is closest for the purpose of the "Tip Of The Spear" stratagem, consider only Black Legion units.
2. The orb of Unlife cannot be used when the bearer is within 1" of an enemy model or has fallen back or when other game situations occur where the model would not be able to shoot.
3. The Sightless Helm also affects a Lord Discordant's Hellstalker Attacks.

4. Units affected by the Shattering Truth warlord trait can use the counter-offensive stratagem to break the order in which it is supposed to fight.
5. The Tenebrous curse and stratagems like Tremor shells and Suppressive fire do not stack. Modify the movement only once. Round up the altered movement characteristic before working out the effect of Jaws of the World Wolf.

VIGILUS DEFIANT CLARIFICATIONS

GENERAL

1. Roll for the strength and amount of shots for the Da Souped-Up Shokka every time it shoots.

ADEPTA SORORITAS BETA CODEX

GENERAL

1. Acts of Faith cannot be used on/by units currently embarked.

ADEPTUS CUSTODES

GENERAL

1. When Unleash the Lions is used to split up a squad into separate units, each of those counts as a separate killpoint once they are destroyed from that moment on, disregarding prior casualties sustained.

ADEPTUS MECHANICUS

GENERAL

1. Units affected by Phosphor Weapons cannot benefit from cover for wounds caused by those weapons.
2. Litany of the Electromancer takes effect directly when the canticle is picked, either at the start of the battle round or whenever a canticle is changed during the game. Enemy units are only affected once per turn by the Litany.
3. The Scryerskull can only be used when Dawn raid, Low Visibility or Cover Of Darkness rules are in play. The command point used allows you to perform a shooting attack ignoring the effects from aforementioned rules. It does not allow you to make extra shooting attacks in any phase.
4. Benevolence of the Omnissiah (codex Adeptus Mechanicus) and Benevolence of the Machine God (codex Imperial Knights) do not count as the same stratagem.
5. The Master of Biosplicing warlord trait is considered as a repair in all regards. As such, it can trigger Tech-Adept and can benefit from Necromechanic, just to name a few interactions.
6. A tech priest manipulus that exchanges his Magrail Lance for a Transonic Cannon is basecost 85 points.
7. The effects of Wrath of Mars last until the end of the shooting phase in which the stratagem is used.

ASTRA MILITARUM

GENERAL

1. For every point of damage that would take Yarrick's last wound, roll once for his Iron Will ability.
2. Commander Pask can give orders to his own Leman Russ tank.
3. Ratlings cannot use their Shoot Sharp and Scarper ability to move after firing overwatch and can never advance while using the ability.
4. When using the 'Ambush' stratagem, note that it applies before units are 'dropped' and as such this implies that a unit being transported must be a Tallarn unit and counts towards being one of the three Tallarn units set up in Ambush. Tallarn tanks being set up this way can do so even if they carry sponsons and would not technically be able to be set up.
5. Vostroyans using the 'Repel The Enemy' rule can fire all their non-pistol, non-grenade weapons, all their pistol weapons, or a grenade, following all the normal rules for shooting.
6. 'Overlapping fields of fire' is checked on a model by model basis in a unit to determine if a +1 to hit applies to their target. Do not apply a blanket +1 to hit to an entire units shooting attacks when only some of the models in a unit are targeting the unit affected by the stratagem. Only one enemy unit can be chosen as the target of the stratagem.
7. Only one of each vehicle equipment can be bought per vehicle.
8. Units that do not have a 'Regiment' keyword, like Commissar Yarrick, can issue orders to any unit with the regiment keyword using the Master Of Command warlord trait.
9. Resolve the first order fully before issuing a second, different order using the 'Laurels Of Command' relic.
10. Once you joined two infantry squads via the 'consolidate squads' stratagem you cannot further use the stratagem on that consolidated unit. The consolidated unit will only yield one killpoint once it is destroyed.
11. A model with the Steel Behemoth rule cannot fire overwatch when it is already engaged in combat. Steel Behemoth allows the tank to target enemy units within 1" even if those units would be within 1" of other friendly units as well.
12. A unit that advanced in the movement phase can still 'move move move' instead of shooting even though technically it cannot shoot.
13. Kurov's Aquila does not apply to stratagems used before the start of the battle like when purchasing additional relics. In addition, for stratagems used before the start of the first battleround, only proceed to roll when the character bearing the relic is on the battlefield when said stratagem is used.
14. Only one Crusader squad can be affected by an Act of Faith per turn.
15. Summary execution can be used for more than 1 unit that happens to fail a morale test within 6" of a commissar, and not just for the first unit that fails morale.

BLOOD ANGELS

GENERAL

1. Blood Angels infantry and BA biker units within 6" of a Sanguinary Priest and Brother Corbulo only get +1 to their Strength characteristic. Do not apply the bonuses from the Blood Chalice and The Red Grail abilities together.
2. The Sanguinary Priest's Blood Chalice and Narthecium and Brother Corbulo's Narthecium/Red Grail only affect friendly BLOOD ANGELS INFANTRY or BLOOD ANGELS BIKER units.

3. The Visions Of Sanguinius stratagem can be freely used before the start of the game even though it was not mentioned on your armylist prior to the start of the event.

CHAOS DAEMONS

GENERAL

1. Any model with the Nurgle and Daemons keywords will add to Epidemius' Tally of Pestilence. The tally of pestilence ability only works when Epidemius is on the table.
2. The Horrors from a Burning Chariot do not add any bonus besides granting the irritating chant ability. Range for the ability is checked from the chariots base.
3. Once cast, Virulent Blessing lasts until the start of the next psychic phase.
4. A Feculent GnarlmaW placed by Horticultus Slimux costs reinforcement points as it is a new unit. It cannot be summoned via Daemonic Rituals.
5. A unit of Plaguebearers under the effect of the Locus of Virulence and Virulent Blessing would be doing 4 damage for each wound inflicted that fulfills the criteria.
6. Where the Crimson Crown would interact with Death To The False Emperor, work out any extra attacks separately as they cannot generate extra attacks.
7. Warp surge and Ephemeral form do not allow one's save to be better than a 3++ at any given time. Even in conjunction with the Impossible Robe, rolls of 1 and 2 are still failed saves.
8. Chaos Daemon stratagems only work on Faction Daemon keyword models. This includes auras obtained by stratagems like Aura of Conjunction. The auras only ever apply to faction Daemon models.
9. Where Sloppity Bilepipers "Disease of Mirth" interacts with a harlequins Silent Shroud Masque or any similar effect, disregard both abilities. Instead, the plague bearers roll 1 dice when making their morale test.
10. Gaze of fate allows you to re-roll a single dice, not an entire dice-roll.
11. Note that any horrors that are generated when they split cannot be placed within 1 inch of enemy units at the moment they are generated.
12. When SY'll Esske does not actually move as part of a consolidation move (by being in B2B contact for instance) she will still have finished a consolidation move in the fight phase and will be able to fight again. When she selects a new target, this can be any legal target, even the one she had attacked previously.
13. Units under the effect of the Forbidden Gem cannot act until the phase it applies to is completely done. This precludes abilities, stratagems or other things that may take effect at the end of any phase to circumvent the effect of the Forbidden Gem. In essence, the effect of the forbidden gem lasts until the next phase begins.

CRAFTWORLD ELДАР

GENERAL

1. When using Battle focus, the unit can shoot with rapid fire, assault or pistols without any modifier if it is making an advance. Remember that the unit still is affected by a -1 for shooting with a heavy weapon while moving and cannot shoot with heavy weaponry at all while advancing.
2. A Wave Serpents Serpent Shield ability can only be used in the owning players shooting phase to function as a weapon.
3. When Fortune is cast on a unit that already benefits from Spirit Stones, simply apply the best modifier/save. Abilities like these never stack.
4. Apply Fortune after all wounds have been allocated to a model, this means after applying (multiple) damage.

5. An Autarch does have to pay for his Forceshield.
6. Swooping Hawks do not count destroyed if they skyleap as long as they arrived before the end of the third battleround. The unit will count as destroyed if they are not on the table when the battle ends.
7. A unit may use its warpjump generator when falling back.
8. The Eldar Bonesinger datasheet can be used at the ETC.
9. The Path Of Command can only be used for command points spent by the player invoking the Warlord Trait.
10. When using Phantasm and setting up units again, they cannot be set up elsewhere than on the battlefield even if the unit has an ability that would allow it, as locale for setup cannot be changed.
11. The use of Phantasm needs to be declared after both sides are deployed, at the beginning of the first battleround but before the start of the first turn. Eldar players need to state they will use Phantasm before any potential dice-off has occurred to determine who gets to setup units outside of the normal deployment phase, like those occurring before the start of the first turn. In case of an Eldar on Eldar game, if one player does not declare the use of Phantasm, the player making use of the Stratagem sets up his units before continuing the roll-off. If both players declare, the roll-off to determine who gets to setup units outside of the normal deployment phase decides who gets to set up a unit via phantasm first. Alternate units making use of phantasm before proceeding to other units that are setup before the start of the first turn.
12. Fire and Fade cannot be used when a unit is engaged in combat.
13. The Yncarne can heroically intervene on the turn it is setup.
14. When setting up an Aeldari Webway Gate, place it so that the distance between the two nearest parts of the model that are on the table are 5" apart.
15. When casting runes of battle, whether the power is successfully manifested or not, and is subsequently dispelled or not (whether through a deny the witch roll or Stratagems such as "Steel Mind, Iron Logic"), the Eldar player needs to declare which effect was chosen for the power as that effect cannot be chosen again this phase.

DARK ANGELS

GENERAL

1. Asmodai's Exemplar of Hate, Ezekiel's Book of Salvation, and a Deathwing/Ravenwing Apothecary's Narthecium only affect friendly DARK ANGELS INFANTRY or DARK ANGELS BIKER units.
2. The Secret Agenda Stratagem is not in play at the ETC.

DEATHWATCH

GENERAL

1. Passengers from open topped transports targeting a Corvus Blackstar with an Infernum halo-launcher will also suffer an additional -1 to hit.
2. When a Xenophase Bade would interact with a Shadowfield, all the successful shadowfield saves must be rerolled.
3. When Atonement Through Honour comes into play, players have to engage their models by bringing them within 1" of enemy models whenever they are able to.
4. Mixed units that also comprise biker models cannot benefit from the Teleportarium stratagem nor the Beacon Angelis.

DRUKHARI

GENERAL

1. An Archon will not lose its shadowfield save when it suffers a mortal wound.
2. State on your armylist if Combat Drugs will be determined randomly. In any other instance, Combat Drugs chosen need to be listed on the armylist but can be changed freely before the battle subject to the restrictions mentioned on page 87 of the Drukhari Codex. Note that you must cycle through all 6 of the combat drugs before you can choose a bonus that has already been taken by another unit. This also applies after the first 6 combat drugs are chosen, then the cycle starts again until all 6 are chosen again, and so on.
3. The Master of Pain ability does not work cumulative. Apply the bonus once regardless how many haemonculi or characters with the ability are in range.
4. For Alliance of Agony to be used, a haemonculus AND a Succubus must be chosen (and thus present) in your army. Multiple warlord traits chosen this way are not cumulative unless specifically stated so (meaning that even if you have multiple choices of Diabolical Soothsayer, you will only ever generate D3 command points extra).
5. Stratagems that are used at the start of the battleround, like Architects of Pain or Hyperstimm Backlash, can only be used once each battleround.
6. Check after making all the attacks with an Ossefactor if the conditions are met to make the roll to see if the unit suffers one additional mortal wound.
7. Where No Escape is concerned, do reroll the dice in case of a tie until the roll-off has a decisive winner.
8. Agents of Vect can be used to counter Agents of Vect being played.
9. When a 2-5 is rolled for Agents of Vect, the CP's for your opponent do not count as spent. Do not roll to recuperate those CP with warlord traits, relics, or abilities.
10. In cases where Agents of Vects interacts with one-use stratagems, the stratagem does not count as used as long as its effects haven't been resolved.
11. Units with the Airborne rule from a Red Grief Cult Detachment still cannot perform charge moves.
12. When a roll-off occurs to see if a unit can fall back from combat via the No Escape rule, and a player announces the use of a re-roll (via a CP or otherwise), the other player must decide if he will also re-roll the dice (via a CP or otherwise) BEFORE any of the re-roll results have been determined.
13. Units embarked on open topped transports can use their innate rules like is the case for Kabal units rerolling 1's for poisoned weapons when being from the Poisoned Tongue.

GENESTEALER CULT

GENERAL

1. When using Telepathic Summons, the necessary reinforcement points need to be free in order to be able to set up the unit. Units that enter play this way can freely do so as from turn 1.

2. The Brood Telepathy and Cult Demagogue abilities stack for Cult Genestealer units.
3. The Lurk in the shadows stratagem can only be used in your opponents shooting phase.
4. You can include a Tyranid Detachment, an Astra Militarum/Brood Brothers and a GSC Detachment in the same army.
5. When a GSC's opponent has the first turn, no units can move within 9 inches of ambush markers. This includes start of the battleround movement actions like 'Forlorn Fury' and units that are set up again via other means like Dark Matter Crystal, Da Jump, or any other such interactions. If due to some other rules interactions it would be impossible to set up a GSC unit from an ambush marker like an Infiltrator Squads Omni Scramblers or a Clamavus' Scrambler Array, then the unit counts as destroyed.
6. Wounds generated by Mental Onslaught must be applied to previously wounded models in the unit if one or more is present.
7. A patriarch can only ever cast one additional power regardless of the number of familiars that accompany it.
8. Clandestine Goals is not in play at the ETC.
9. Extra attacks from Overthrow The Oppressors made with a power pick will generate the extra rending claw attack as well.
10. Units that were set up in ambush and subsequently make use of the 'They Came From Below' stratagem must come in before the end of Turn 3 like is the case for all other units making use of being set up in Underground, or count as being destroyed otherwise.
11. Units affected by Mass Hypnosis can use the counter-offensive stratagem to break the chain of when they are supposed to fight.

GREY KNIGHTS

GENERAL

1. A unit redeploying by using the Gate counts as having moved.
2. Heed The Prognosticators can only be used on units that are currently on the battlefield.

HARLEQUINS

GENERAL

1. Where Sloppity Bilepipers "Disease of Mirth" interacts with a harlequins Silent Shroud Masque, disregard both abilities. Instead, the plague bearers roll 1 dice when making their morale test.

HERETIC ASTARTES

GENERAL

1. Tide of Traitors does not require reinforcement points to be paid.
2. When Lord Of Terror would interact with ATSKNF, the space marine player must reroll both die.
3. Any CSM Detachment can include Fabius Bile without losing its legion trait. Ignore Fabius Bile when determining if you have the necessary keywords to make up a CSM Detachment.
4. Eye of Night cannot be used on characters that are also vehicles unless if they are the closest enemy model to the relic-bearer.

HERETIC ASTARTES – FACTION DEATH GUARD

GENERAL

1. Curse of the Walking Pox can bring a unit of Poxwalkers above their starting strength but reinforcement points need to be paid for each model added.
2. Mortarion's 'Host of Plagues' triggers in each player's Fight Phase.
3. The 'Fugaris' Helm' only extends aura abilities themselves. An aura ability is any ability that states "within X inches of this model" or the likes. For instance, the Lord of Contagion's Nurgle's Gift ability stating that All DEATH GUARD units within 7" of a friendly Lord of Contagion are affected, would extend to 10 inches instead. It does not have any bearing on range checks. For instance, the Nurgle's Gift tells you to roll a dice for each enemy unit that is within 1" of any affected friendly units...'. That range is NOT extended to 4 inches because of the Fugaris Helm. Also note it has no bearing on warlord traits and psychic powers as those are not listed in the unit's datasheet.
4. A unit under the effect of Cloud of Flies can be overwatched even when there is a friendly unit closer to the enemy unit that is being charged.

HERETIC ASTARTES – FACTION EMPERORS CHILDREN

GENERAL

1. Note that the Music of the Apocalypse ability is only triggered by things that count as an attack. It wouldn't trigger off of Fabius Bile's Enhanced Warriors ability for instance. If MOTA comes into play outside of the shooting phase, Noise Marines are still not able to target enemy characters that aren't the closest model. MOTA is not triggered when models flee the battlefield as a result of a failed morale test.

HERETIC ASTARTES – FACTION THOUSAND SONS

GENERAL

1. The aspiring sorcerer also benefits from All Is Dust.
2. Magnus' Primarch of the Thousand Sons ability only applies to dice rolled to see if the psychic test is manifested or not, you do not get to reroll dice when resolving the manifesting power as a result of Magnus' ability.
3. Brotherhood of Sorcerers only increases ranges for the target of the spells, not for its effects. For instance, do not apply wounds for models within 9 inches of a target of Infernal Gaze. The range described in the spell to apply mortal wounds remains 3 inches.
4. Gaze of fate allows you to re-roll a single dice from any roll you have made.

HERETIC ASTARTES – FACTION WORLD EATERS

GENERAL

1. Kharn himself will never be affected by his 'The Betrayer' Rule.
2. When Khorne Berserkers charge, resolve their Blood For the Blood God rule as follows: the unit is selected to fight twice as a separate unit having charged that turn. In case the unit did not charge, it can be selected to fight twice per the normal Fight Sequence.

IMPERIAL KNIGHTS

GENERAL

- ~~1. When Endless Fury would interact with Saturation Bombardment, count each unmodified roll of 6 as 4 hits.~~
2. Benevolence of the Omnissiah (codex Adeptus Mechanicus) and Benevolence of the Machine God (codex Imperial Knights) do not count as the same stratagem.

INQUISITION

GENERAL

1. Greyfax's Psyoculum rule does not override the restrictions on powers like Smite.

NECRONS

GENERAL

1. Multi-wound models returning via Reanimation Protocols do so with their full wound complement.
2. Any unit that benefits from a Ghost Arc's Repair Barge rule can only do so once per turn.
3. If the C'tan Shard of the Deceiver's Grand Illusion ability is used to redeploy a transport, the disembarking passengers are also not allowed to charge in their first turn.
4. State on your armylist if powers of the C'Tan will be determined randomly. In any other instance, these powers need to be listed on the armylist but can be changed freely before the battle subject to the restrictions mentioned on page 113 of the Necron Codex.
5. Powers of the C'Tan are not subject to the rules for shooting and hence cannot be used in overwatch.
6. A Tesseract Vault cannot cast the same power of the CTan twice per turn.
7. When checking each enemy unit within 6" for Imotekh's Lord of the Storm ability, apply the effect to every other unit than the initial target.
8. Units set up via Eternity Gate and Invasion Beams are subject to the Tactical Reserves Beta Match Play rules.

OFFICIO ASSASSINORUM

CULEXUS

1. The Culexus' Etherium rule is subject to to-hit modifiers.

CALLIDUS

1. The Callidus' reign of confusion ability does work even when the model is not currently set up on the battlefield. This also applies to the Supreme Deception stratagem.

GENERAL

1. You cannot use Operative Requisition Sanctioned in an army that includes any units with the Chaos or Heretic Astartes keywords, or in armies that do not at least have 1 detachment entirely consisting of models with the Imperium keyword.
2. Priority Threat Neutralised can be used even if the unit that has slain the character would be currently embarked.

ORKS

GENERAL

1. Passengers of a Battlewagon do not benefit from Mobile Fortress.
2. When Flash Gitz's Gun-crazy Showoffs rule comes into play, target the nearest enemy unit that is not within 1" of a friendly Ork unit.
3. The turn Mob Up is used, keep track of effects that apply to specific models (one of the units may be under the effect of Doom or Mindwipe or the like). If one of the units that mobbed up advanced that turn, the entire mobbed up unit is prohibited from charging that turn. The same counts for other such restrictions and interactions. The mobbed unit will only yield one killpoint once it is destroyed.
4. When manifesting Da Krunch, allocate and resolve mortal wounds generated by the first roll before proceeding to roll 2D6 and resolving the second sets of mortal wounds if the roll is 10+.
5. A model using Shokk Tunnel counts as having advanced for all rules purposes after being set up again. It cannot benefit from 'Drive By Krumpin' after having used 'Shock Tunnel'.
6. Gretchin units cannot benefit from stratagems that don't target gretchin units directly like is the case for 'Monster Hunter'.
7. Units embarked upon transports that are open topped can make use of use their DakkaDakkaDakka rule.
8. Ork Mek Guns need to be fielded with their complement of Gretchin as they can be interacted with in-game.
9. **One Scalpel Short of A Medpack only applies in Grotsnik's own charge phase.**

SPACE MARINES

GENERAL

1. The Space Marine Apothecary's Narthecium only affects friendly <CHAPTER> INFANTRY or <CHAPTER> BIKER units.
2. A company champion does need to pay the points for a combat shield.
3. Only units currently on the battlefield can make use of an 'emergency teleport' by means of a Teleport Homer.
4. Count the grenade harness & wrist-mounted grenade launcher as having AP-1.
5. **The And They Shall Know No Fear reroll is used after modifiers to the morale test have been calculated.**
6. **Crimson Fists armies/Detachments can freely choose which chapter tactic to use before the start of each battle at the ETC: the ones printed in the codex or the ones printed in the White Dwarf (see below)**
7. Guilliman counts as being slain when he fails the roll for Armour of Fate or when he gets reduced to 0 wounds a second time in a game.
8. Regarding the Astartes Banner or the Relic upgrade for it, it is acceptable to tactically pull models as casualties from combat so the unit is no longer engaged within 1", leaving subsequent models that are removed as casualties able to shoot the unit it was previously engaged with. Fast Dice rolling is not mandatory in cases like these where

the order in which models are pulled might make a difference. When the banner is used in overwatch, either by receiving casualties from an enemy unit shooting overwatch at it, or models from the unit overheating their guns or some such, the shots generated by the banner are always resolved at a normal ballistic skill as if it were the shooting phase.

9. **Empyric Channeling can only be used in the SM player's turn.**

SPACE WOLVES

GENERAL

1. Units affected by the Armour of Russ can use the counter-offensive stratagem to break the chain of when they are supposed to fight.
2. Announce the use of Keen Senses when you pick a unit to shoot with, prior to choosing a target.

TAU

GENERAL

1. A drone controller does not affect the to-hit roll required when performing Overwatch.
2. A Stimulant Injector works like Disgustingly Resilient.
3. A Nova Reactor wound cannot be re-directed via Saviour Protocols.
4. Wounds can be redirected via Saviour Protocols even if the model redirecting the wounds would already have suffered wounds. Where Saviour protocols interacts with wounds that also generate (sometimes additional) mortal wounds, make a separate roll for each mortal wound generated to see if the mortal wound(s) can be transferred to the drones (any remaining additional mortal wounds that cannot be applied to the drones would still be applied to the original target) or will affect the original target.
5. Check for the range of Invocation Of Elements when range for the ability comes into play. Check range in the movement phase for Zephyrs Grace, morale phase for Calm of Tides, in the shooting phase for Storm of Fire and when a unit suffers a wound for Sense of Stone.
6. Drones that can accompany units may benefit from special rules that allow the parent unit to set up in a special manner, like is the case for Manta Strike. For the purpose of deploying units, the Drones do not count as an extra drop or the 50% reinforcements rule as they only count as a separate unit after they have set up.
7. A Dal'yth Sept unit can benefit from Adaptive Camouflage in its first turn when going second.
8. A Breacher Team can make use of 'Breach and Clear!' when an enemy unit is in cover, even when using a markerlight to negate the bonus to said enemy units saving throw.
9. Only one enemy unit can be the target of focused fire. Define which unit is the target when declaring the use of the stratagem.
10. Any Tau Commander can only take 4 weapon systems.
11. A DS8 Tactical Support Turret is removed as soon as the strike team loses coherency. A support turret remains in play when it is the sole remaining survivor of the unit.
12. Drones bought for other units do not count for the "rule of 3" since they're bought as wargear for that unit.
13. Longstrike's Fire Caste Exemplar rule applies to any hammerhead, with the TX7 designation or otherwise.
14. When an Orbital Ion Beam can affect units on different levels of terrain, the Tau player can choose a level that is affected.
15. When a model uses the Vectored Maneuvering Thruster, it cannot use said move to get within 1" of an enemy model.

TYRANIDS

GENERAL

1. Tervigons need to pay for their Stinger Salvo.
2. As long as a Mawloc has arrived before the end of the third battle round, the burrowing ability can be used after the third battle round. The Mawloc will count as destroyed if he is not on the table when the battle ends.
3. Old One Eye is affected by his Alpha Leader ability.
4. Having more than 2 pairs of Scything Talons or Massive Scything Talons does not provide any other bonus attacks.
5. A Broodlord is affected by the Brood Telepathy ability.
6. Units that spawn a Spore Mine on a miss do not need to pay reinforcement points for it. **Spore mines generated during the battle are subject to the Living Bombs rule and will not award any VP's nor count towards the killpoint scoring.**
7. A Tyrannocyte can only ever carry one unit.
8. Only units with the Hive Fleet keyword can be the target of Catalyst or Dominion.
9. A unit under the effect of Onslaught still cannot charge when it had used the Metabolic Overdrive stratagem.
10. When using the Enemy Below stratagem, the Jormungandr unit can follow any Mawloc, Ravener or Trygon from the tunnels regardless of their hivefleet keyword.
11. The Hive fleet Kraken adaptation lets units fall back and charge, as well as rolling 3D6 for advances picking the highest result. It does not confer permission to advance and charge.
- ~~12. The Opportunistic Advance and Metabolic Overdrive Stratagem cannot be used when a unit is affected by the Swarmlord's Hive Commander ability, the Overrun Stratagem, or the Mind Eater Warlord Trait.~~
13. A unit under the effects of the Paroxysm psychic power can still use the Counter-Offensive Stratagem to break the chain of when it is supposed to fight.
14. **A unit under the effect of 'Onslaught' can fire heavy weapons even if it advanced.**

YNNARI AELDARI

GENERAL

1. When using the Inevitable Fate stratagem, players can opt to not re-roll successful wound rolls.
